Lancaster Farming

Vol. 17 No. 30 | Lancaster Farming, Saturday, June 17, 1972 | $2.00 Per Year

Donna Jean Book Captures Dairy Princess Title

Effervescent, ebullient and teary-eyed, Donna Jean Book was crowned Lancaster County Dairy Princess Thursday night at the Farm and Home Center. Over 250 guests witnessed the pageant

in which the daughters of 12 local dairy farmers participated.

Miss Book's parents are Mr. and Mrs. Roy A. Book, R.D. 1, Ronks. They have a herd of 125 Holsteins.

Runner up in the contest was Rhoda Stauffer, daughter of Mr. and Mrs. Clarence Stauffer, R.D. 1, Ephrata. The title of Miss Congeniality was won by Sharon Kreider, daughter of Mr. and Mrs. Noah Kreider, Jr., R.D. 3, Manheim.

This year, as in past years, Mrs. Robert Gregory provided a good deal of the motivating force and energy for the running of the pageant. She is chairman of the Princess Committee.

A panel of judges interviewed each of the contestants during the day, watched the girls answer questions of master of ceremonies Harry Kauffman, and announced their decision shortly after 10:00 p.m

Kauffman is director of public relations for the Philadelphia Dairy Council. Judges were Joyce (Mrs. Marlin) Shenk, 1962 Lancaster County Dairy Princess, Boyd Gartley, farm relations director for Inter-State Milk Producers, Philadelphia, and Richard Wanner, editor of Lancaster Farming.

Miss Book will represent the County in the state contest at Harrisburg in September. And she will be making public appearances throughout the year on behalf of the dairy industry. Miss Book is a 1972 graduate of Conestoga Valley High School where she was a member of the honor society. She is employed as a secretary by Nolt Rambler, Inc.

Rhoda Stauffer, runner-up, is a senior at Ephrata High School. She is active is sports programs and plans to attend college, majoring in physical education, after graduating from high school.

Miss Congeniality, Sharon Kreider, is a junior at Manheim Central High School. She'll spend this summer working in the family dairy store, which celebrated a grand opening yesterday.

Other contestants were Patti Baltozer, Veronica Bare, Ralene Harbold, Carol J. Kettering,

Rhoda Stauffer, left, and Sue Kauffman congratulate Donna Jean Book as she was named Lancaster County Dairy Princess Thursday night at the Farm and Home Center.

Grassland Chapter Awards Presentations

Special awards were presented to FFA members during the monthly meeting of the Grassland FFA Chapter meeting Monday night

Michael Martin, son of Mr. and Mrs Robert E. Martin, New Holland RD1, received the Victor F. Weaver FFA scholarship award from Allen Tate. This award is presented annually to an outstanding student in the field of poultry. As part of the Poultry Man of the Year requirements, Martin wrote and submitted an essay. He received a $200 cash prize.

Keystone Farmer citations were presented to four students. Receiving citations were: Nelson Martin son of Mr. and Mrs Clyde Martin, East Earl; Carl Musser, son of Mr and Mrs David Musser, Mohnton, Gary Stauffer, son of Mr. and Mrs. Eli Stauffer, Vogensville, and Dale Weiler, son of Mr. and Mrs Mervin Weiler, Elverson.

The Leon M. Graybill Memorial Scholarship was presented to Dale Weiler by Mr. Stan Dean This award is presented for outstanding leadership, scholarship, and character.

Clifford Day, FFA advisor, presented the DeKalb Achievement award to Nelson Martin for his outstanding achievements in the FFA Martin also was the recipient of the Star Chapter Farmer award, an

SPRING LAMBS — Choice 70-95 lbs. 35.00-36.00; Good 65-90 lbs. 31 00-34.00.

SLAUGHTER EWES — Utility and Good 7.00-10.00, one lot Cull 4 50.

Local Grain

Thursday, June 15

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, June 15, 1972 are as follows:

	Bid+	Offered+
Ear Corn	39.00	45.33
Shelled Corn	1.37	1.55
Oats (local)	.68	.95
Oats (western)	1 01	1.12
Barley	1.01	1.24
Wheat	1.39	1.60

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Bulls Utility, Commercial and Good 28 00-32 50. Commercial 1-2 33 00-33 50, instances 34 00 Cutter and Low-Utility 25 00-28.00.

DIFOLATAN® 4 FLOWABLE

The leading flowable fungicide made to fight potato blight.

DIFOLATAN gives excellent protection against both early and late blight. And is particularly effective against tuber rot.

DIFOLATAN sticks to the plant, resists weathering from rain or sprinkle irrigation. That means you can maintain your schedule without worrying about the effects of weather or irrigation.

Protection against tuber rot is outstanding. When you put potatoes in storage, you'll never know how well you did in the blight fight until you've shipped the last of them. Fields may look reasonably healthy before harvest, but if you put infected tubers into storage, you can find yourself with a costly, heavy cull out of late blight tuber rot infection.

DIFOLATAN works to give you greater yields of healthy potatoes. And—because it's flowable—it does that even better.

Another good thing about the fastest selling potato fungicide. It works on cucumbers, melons, and tomatoes, too.

Put the leftovers from balls of knitting wool in glass jars and store in the basement. This method keeps the moths out and you can easily see the colors at hand

To Obtain Farm Pond Permit

There are many farm ponds in this county and in this part of the state; many of the ponds present a problem with algae and weed control. The prevention of this problem is the best cure because once the pond is covered with algae or filled with weeds, it is very difficult to entirely remove the material. Both of these problems are usually caused by the water being too shallow (less than 18 inches) or because the water is allowed to stay clear. Clear water allows the penetration of the sunlight into the bottom of the pond and encourages the growth of weeds and algae. Present regulations require that pond owners fill out a permit and get permission from the Pennsylvania Fish Commission before treating their ponds. This is important to protect yourself from any possible damages done downstream after the pond is treated. Application blanks are available from our Extension Office or from local Fish Patrolmen.

Call on Casserole

Gardening calling? Casseroles can come to a busy woman's rescue, if she gives them a chance. Prepared early in the day and refrigerated, they free a cook of concern for meal preparation while she's out or away. It takes little time to brown ground beef to add flavor and food value to made-ahead rice, macaroni, spaghetti or noodle casserole combinations that travel with ease from refrigerator to oven to table.

In the Kitchen

MEXICAN HOT CHOCOLATE

4 tbsps sugar
4 tbsps. unsweetened cocoa
½ tsp. ground cinnamon
Dash ground nutmeg
½ cup water
1 qt. milk
1 egg white, unbeaten

Combine sugar, cocoa, cinnamon and nutmeg Blend in ½-cup water and boil one minute. Beat milk and egg white together only until blended; stir into chocolate syrup Cook until hot (do not boil), beating constantly with a rotary beater Serve hot with cinnamon sticks, if desired Makes six portions

These were the twelve contestants in Thursday night's Dairy Princess pageant. Left to right: Karen Overly, Brenda Kreider, Donna Jean Book, Ralene Harbold, Rhoda Stauffer, Donna Welk, Judith Wilson, Patti Baltozer, Sharon Kreider, Carol Kettering, Veronica Bare and Janet Stoltzfutz.

For the next year, Donna Book will be wearing the blue ribbon of the Lancaster County Dairy Princess. She is shown here receiving the ribbon from Sue Kauffman, 1971 Princess.

Master of Ceremonies, Harry Kauffman, querying runner-up Rhoda Stauffer on her future plans.

A near capacity crowd was on hand to watch this year s Dairy Princess Pageant.

The Grassland FFA Chapter held a special awards recognitions meeting Monday night at New Holland. During the meeting Keystone Farmer citations were presented to the following: (left to right) Dale Weiler, Nelson Martin, Carl Musser, and Gary Stauffer.

Grassland Chapter Awards Presentations

(Continued From Page 1)

award presented to the top FFA boy in the Grassland Chapter by the Lancaster County Bankers Association.

The Grassland Chapter was presented the trophy for having the top land judges at the County Land Judging Contest. The trophy received is a rotation trophy presented annually to the top Chapter in the land Judging Contest. Cash awards and ribbons also were presented to the two top judges, Dave Smeltz and Nelson Messner.

Miscellaneous awards and ribbons were also presented to Grassland FFA members. The Public Speaking trophy was presented to Jim Zimmerman for placing second in the County FFA Public Speaking Contest; a ribbon was presented to Delmar Weaver for placing third in the County Public Speaking Contest.

A plaque and first place ribbons were presented to the members of the first place Grassland Chapter for winning in the County Parliamentary Procedure Contest.
Contest.

Ribbons and cash awards were presented for placings in the County Milk Products Contest. Receiving awards were: Ken Groff, third place; Elvin Hursh, sixth place, and Dennis Nolt, seventh place.

A cash award was presented to Delmar Weaver for having placed fifth in the area Meat Judging Contest.

Help Us Serve You

Don't assume we know about your farm organization's meeting. To get your meeting on our Farm Calendar, it's safer to assume we don't know.

Remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St., Lititz, Pa. 17543. You'll be helping us to serve you better.

P.S. — If you're not sure you told us already, we don't mind hearing from you again.

Donna Jean Book

(Continued From Page 1)

Brenda K Kreider, Karen Overly, Janet Stoltzfus, Donna Ruth Welk and Judith Wilson.

Patti Baltozer is the daughter of Mr. and Mrs George R Baltozer, 600 Summit Drive, Lancaster She works as a dental assistant and is a senior at Hempfield High School After graduation, she hopes to attend Reading Hospital School of Nursing

Veronica Bare is the daughter of Mr. and Mrs John Bare, 419 Mount Sidney Road, Witmer She graduated this year from Conestoga Valley, and is a secretary at Witmer's Cabinet Shop.

Daughter of Mr. and Mrs. Ray R. Harbold, Ralene Harbold is a dental assistant in the office of Dr. Werner Fetter, Elizabethtown. She is a recent graduate of Elizabethtown High School and lives at Elizabethtown, R3.

Carol J. Kettering graduated this year from Manheim Township High School, and is the daughter of Mr. and Mrs. Henry E Kettering, Lititz R3 She hopes to do volunteer work with the Brethren Volunteer Service.

Brenda K. Kreider, daughter of Mr. and Mrs. J. Floyd Kreider, Mount Joy R2, is a senior at Hempfield High School. She hopes to do volunteer work with underprivileged children after graduation.

Mr. and Mrs. Alfred Overly, Quarryville, R1, the parents of Karen Overly, a senior at Solanco High School. She plans to major in home economics following graduation.

Janet Stoltzfus is a senior at Solanco High School. She is the daughter of Mr. and Mrs. Omar Stoltzfus, Quarryville, R3. After graduation, she plans to be a secretary, and presently works parttime for Fenninger's Custom Kitchens and Vintage Sales Stables

Another Solanco High School Senior, Donna Ruth Welk, hopes to become a medical secretary after graduation Her parents are Mr and Mrs Ira D Welk, R3, Quarryville

Judith Wilson is the daughter of Mr and Mrs Henry R Wilson, Nottingham, R2 She is also a senior at Solanco, and hopes to attend a junior college after graduation

Meat Consumption Rises in the U.S.

The per capita consumption of red meats (beef, veal, pork, and lamb) reached a record of 192 pounds in 1971, up nearly 40 per cent in 20 years. Nearly all of the net increase resulted from a sharp rise in beef consumption, says H. Louis Moore, Extension agricultural economist at Pennsylvania State University

Beef Breeders Voice Concern For Future of Steer Shows

Concern over the future of the nation's steer shows and their present low value to the beef industry has been expressed by the U.S. Beef Breeds Council, whose members said they cannot continue to accept "some common practices" of exhibitors at those shows.

Composed of nine established beef breed registries, the Council stated that "some positive changes must take place if steer shows are to regain their beneficial objectives", and "if those changes cannot be implemented, the major emphasis of breed associations should be shifted to junior breeding heifer shows".

The Council met in Kansas City to consider methods of implementing rules and procedures which would make the junior steer shows of more educational value and more meaningful to the beef industry. The Council recently recommended the elimination of "open" or adult steer shows. That recommendation is generally being accepted at most major shows.

The discussions concerning Junior steer shows ranged from expressions of futility in supervising equitable rules for shows and controlling ineligible exhibitors to high hopes that the shows could be made even more meaningful than in the past.

Council members generally agreed that the steer program was a worthwhile activity for youth, and that the benefits to youth in educational value and self discipline and leadership development justified the continued support of the Council. They also agreed that steer shows were of benefit to the beef industry in training young breeders and for promotion of purebred seedstock.

However, the future effectiveness of those shows depended on drastic and sweeping changes which would require close supervision and enforcement, the Council said.

The Council agreed that the most significant problem was in the identification, including permanent identification of the individual steer and of the owner, and the age and breed of steer.

The Council recommended that all steers be fire branded at the beginning of the project before they are shown in the exhibitor's county show, and certainly before entrance in shows of state level or higher. This identification would have to be made at least 120 days prior to the show, using a code system that would reveal the breed and the state from which the entry was made.

The Council also recommended that all shows have a uniform ownership requirement of at least 120 days prior to their respective show date.

Both the identification and entry deadline recommendations would help eliminate a practice of some exhibitors who purchase an animal at one show for exhibit at later shows, Council members explained.

Each breed association would assume the responsibility of determining eligibility of entries by breed identity. In case of disputes, a respective breed representative or a committee selected by the respective breed association would rule and decide on the exhibitor's eligibility to receive association premiums.

The Council restated earlier recommendations that carcass contests should be combined with regular established on-foot steer shows with the top end of the cattle being slaughtered and entered in the carcass show, the number determined by the cooperation of local packing plants.

Also, the group earlier recommended that breed associations not pay premiums in on-foot classes where these carcass shows are separate from regular steer show classes at the same fair or exposition or on carcasses that do not grade choice. It was further recommended that breed associations support individual carcass classes at the rate of 20 per cent of the total premiums paid.

The Council is composed of breed registries of Angus, Brangus, Brahman, Charolais, Hereford, Polled Hereford, Red Angus, Santa Certrudis, and Shorthorn breeds.

USDA Proposes Changed Dairy Inspection and Grading Rules

The U.S. Department of Agriculture has proposed changes in its voluntary dairy inspection and grading program to limit appeals for reinspection or regrading of products contaminated by filth or other harmful substances.

Under the dairy inspection and grading program, any interested party who disagrees with the original inspection or grading of a product may appeal the findings. The proposal would limit such an appeal on contaminated products to a review of the sampling procedures and a reinspection of the original official sample.

The limitation is being proposed because such substances are not evenly distributed throughout a product. Thus, reinspection using a different sample, as may be done in other appeals, might in this case result in inaccurate findings.

The proposed changes also would update some of the wording in present regulations to reflect current inspection and grading practices and organizational structure.

The dairy inspection and grading program is administered by the Dairy Division of USDA's Agricultural Marketing Service, and is paid for by the user.

The proposed amendments appeared in the June 8 Federal Register. Anyone wishing to comment should send written views and comments in duplicate to the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, by July 10. All comments will be available for public inspection.

Solar System

The solar system is the sun with its group of celestial bodies which, held by its attraction, revolve around it. This group includes, so far as is known, nine major planets with 31 satellites, minor planets or asteroids and, also, comets and meteors.

DA 1230

There's A Difference!

Here s a rugged new breed of silo unloader with a big difference from other machines — a difference that means better performance

The DA 1230 has double augers, but more important, they're **differential augers.** The rear auger is larger than the front auger and the two augers turn at different speeds The result is up to 30% more wall pressure for smoother performance in all types of silage, soft or frozen Silage flows into the impeller in an even stream — no slugs or pads of silage that can clog other machines and rob capacity The differential augers break up compressed silage to give you smoother operation and greater capacity You get Non-Stop Feeding with the new DA 1230 unloader

From Local Ag Teachers:

Thoughts in Passing

Editor's Note: The article this week was prepared by August Birchler, agriculture department chairman at Penn Manor High School.

The Different Faces of Agriculture

Talk to an urban housewife and ask "What is agriculture?", she'll probably say "Oh, that's a farmer." Ask a rural storekeeper "What's agriculture?" — and he most likely will show the fields around his business and say, "That's agriculture."

But really, there is much more to agriculture than either of the two people stated. Today, there are eight different areas of agriculture being studied in our high schools. Those areas are:

1. **Agriculture Production** — Examples of this area would be crop production, livestock production, poultry production, and dairy production.

In crop production, programs are designed to encourage students to employ the best management practices available for successful production and marketing of crops such as forages, grains, and pasture as well as specialty crops such as vegetables and fruit.

In livestock production, programs are developed to stimulate students to employ the best management practices available for the efficient production and marketing of swine, beef or sheep.

In poultry production and in dairy production the students are given programs that hopefully will stimulate them to employ the best management practices available for producing and marketing a quality product.

2. **Agricultural mechanics** — It is in this area that programs are developed to help the students enhance their knowledge and abilities in the fields of agriculturally related equipment and building. This program includes all repair and maintenance of agriculturally related equipment, agricultural construction, concrete work, and skills of wooden construction, along with those skills needed for the environmental control in buildings associated with livestock, crops, processing, and storage.

3. **Agricultural Supplies and Services** — Programs in this area are basically exploratory - that is, students are exposed to experiences that will develop those occupational competencies needed by the individuals preparing to enter the occupations of sales and services in off-farm agriculture. Places of employment may include: roadside markets, feed and other farm supply business, florist shops, garden centers, and equipment dealers.

4. **Agricultural Products** — In this area activities are designed to teach basic principles and management decisions involved in the science and technology of processing agriculturally related crop and livestock products

5. **Agricultural Resources and Environmental Science** — This area can be divided into three areas:

a. Soil, Water, and Air Management — The agricultural students are taught the management practices that will improve the productivity of the soil, prevent erosion, promote the efficient use of air and water so that pollution can be reduced.

b. Outdoor Recreation — The students are made aware of the multiple opportunities that the land has to offer, kinds of recreation generally best suited

August Birchler
Vo-Ag Instructor
Penn Manor

for family use, or as income producing enterprises vacation cabins, camping areas, picnic groves, fishing, hunting, and guest farms

c Fish and Wildlife Management — Programs that will improve the availability of fish and wildlife, such as conservation and improvement of existing land and water habitat, plus the development of new areas

6. Ornamental Horticulture — This area of agriculture is taught in two of Lancaster County's Vo-Techs, Brownstown and Mount Joy.

Subject matter is concerned with the culture of plants used principally for ornamental or esthetic purposes. Experiences may be organized under such titles as floriculture, turf management, greenhouse operation and nursery operation.

7. **Forestry** — In Lancaster County forestry in the total agricultural program has been decreasing; but, in some areas of Pennsylvania forestry is a major source of income.

Schools teaching forestry provide educational experiences concerned with the multiple use of forest lands, including their management and protection

8. **Other Agriculture** — It is under this area that programs are developed and experiences offered for programs not listed in other areas, such as:

a. Home improvement.

b. Careers that require college education. Examples would be teacher, vet, agricultural engineer.

Peach Growers Say No To Marketing Program

Pennsylvania peach producers turned down a Peach Marketing Program in a referendum conducted by mail late last month.

The votes were counted Tuesday, June 6, and the final tally was 57-66, with 28 ballots declared spoiled. Tellers were J. Vann Lott, Adams County; Richard S. Frecon, Berks County; and C. Everitt Richardson, York County, all peach producers

Less than half of the eligible peach growers participated in the voting. Eligibility was based on having orchards with at least 500 peach trees.

The State Horticultural Association of Pennsylvania had requested that the Pennsylvania Department of Agriculture call for the referendum which would have the producers assessing themselves three cents per hundredweight of their peach sales

Peach production in the Commonwealth averages about 100 million pounds annually and the marketing program would have yielded about $30,000 to be administered and spent by the peach growers for the promotion of peaches in the state and for dues to the National Peach Council

A similar program for apple growers has been in operation since 1967 and was reaffirmed in 1970.

Real vanilla is derived from an orchid, "vanilla planifolia." The vanilla flavor is locked in a "bean" which develops when the beautiful flower is pollinated. This bean-like fruit undergoes a long curing process before the vanilla flavor is extracted. Most children will agree that the best use of this "exotic" flavor is in quality vanilla ice cream.

It is a fact today that more people are employed in off-farm agriculture than on-farm; yet, it remains that agriculture has but a single meaning to a vast majority of our countrymen — Farming

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. A good pasture with a pH of 6.5 or higher, for example, will make 300 to 400 lbs. of beef per acre and produce up to $100 gross income per acre. This means with the help of lime, profits from pastures can compare favorably with feed or grain crops.

Martin's Limestone

One on a Tractor

Summer visitors this year will be guests on many local farms. If you're hosting cousins from Cleveland (or even paying guests), we hope you have a ball. We also hope you keep them away from farm machinery.

A guest who doesn't know the difference between a baler and a forage harvester doesn't even belong in the same field with one of them The more distance you can put between guests and equipment, the better.

Guests should neither operate nor ride on tractors. Too many things can happen. Accidents can cripple and kill, and they can result in mountainous lawsuits against a farmer.

And, while we're on the subject, let's remember to keep everyone but the operator off farm equipment Even experienced farmhands can bounce off a tractor fender.

As with every summer, things are bound to get pretty hectic. But remember your safety rules, and you'll make it a good summer for everyone.

Letter to the Editor

Editor, Lancaster Farming:

This is in response to your editorial which appeared in the Saturday, June 3, 1972 Lancaster Farming Newspaper Farmers have and always will fear the dropping of State Retail Price Regulations. It has been reported that all Pennsylvania farmers are protected by the Farmer's Milk Marketing System.

First, 20 per cent of the milk supply in Pennsylvania has no federal milk order protection.

Secondly, in the past year and a half, dairy farmers producing milk for sale in New Jersey have lost in excess of one million dollars because of no payment for the milk delivered to their dairies. This milk was under the FM Order System. Two dairies, namely Raritan Valley and White House, declared bankruptcy and farmers have always absorbed the loss. October 1, 1971, our sister cooperative in New Jersey, the United Milk Producers of New Jersey, go out of existance. Ask any of these dairy farmers about protection. Inter-state Milk Producers Cooperatives 3,000 members have always supported "Market Tools" that protected farmers and consumers - Retail Milk Producers does both.

Thirdly, a close look at price facts. With 1967 equal to 100 to retail prices of non-food items rose 22 points in 1971. Food prices increased 6 points less. Prices paid by farmers for the things they bought from city folks increased 21 points while prices paid to farmers increased nine points less. City people get the better of this deal.

In the "market basket" retail food value increased 15.1 per cent as compared to the same value increase of 13.8 per cent. The price spread between farm and retail has increased 16 per cent, but the middle men have higher operational costs than farmers have. No one is making a killing.

Consumers will spend 8 per cent less of their take-home pay for food this year compared to 20 years ago. If food prices had gone up in proportion to "take-home" pay, consumers would average $286 more per person for food this year than 20 years ago.

Milk is your best food buy. One pound of protein in hamburger costs $5 - in milk $3.75. It takes $2.20 worth of hamburger to equal the total nutritional value of $1 worth of milk.

Retail milk producers regulations are not complicated - just misunderstood; and so is the product milk.

I don't understand why everyone wants to ride a cow; horses are so much nicer.

Boyd C. Gartley
Dir. of Member and Public Relations
Interstate Milk Producers Cooperative

Does Celery Really Have a Heart

Hamlet soliloquized about the slings and arrows of outrageous fortune. And apt poetry it was, for the tragic, beleagured king of Denmark, who was, you know, a person Of course, if Hamlet had been a chickweed or a giant plantain, he might have lamented, instead, the dics and harrows of outrageous fortune. And if he had been a dandelion, the immortal bard might have had him saying, "Oh, that these too, too succulent leaves would wither . . "

But wait! you say Plants don't have feeling A chickweed can't soliloquize A plantain can't kill its mother A burdock can't be in pain, it can't communicate, it can't react .

Cleve Baxter, a lie detector specialist from Washington, disagrees. Baxter, you see, connected his lie detector electrodes to a plant in his office. Describing the results of the experiment, Baxter said:

"Surprisingly, the contour lines on the charts were similar to typical reactions of a human I thought about testing its reactions and decided to burn it with a match. At that very instant the recording pen bounced off the top of the chart. The initial result indicated that plants have some sort of perceptive ability."

Plants evidently know what's happening. We don't recommend that everyone become a meatarian, but the next time you bite into a juicy red tomato, you might at least say "Excuse me."

And if plants can sense the evil you're planning to do them, they might also be able to perceive the concern you feel for them A corn plant that feels wanted might produce a bigger ear than one that feels neglected.

As an experiment, you might want to stand in the middle of your cornfield and tell your plants that you love them. We recommend performing the experiment late at night. Not that darkness would enhance the experiment, but it might save your reputation.

Grassroots Opinions

WILSON, N C., TIMES: "Driving drunk is going to cost money. It is largely responsible for traffic accidents and deaths, so government is pushing the states to punish the repeaters, to take away their licenses for a long time, and to see that they take a cure. Everything else has been tried and with little success. Now just about the most precious thing a man has, his driver's license, must go. And is it will stop the highway killing, the sooner the better."

VINCENNES, IND., THE VALLEY ADVANCE: "Relations are reported to be so good between mainland China and the U.S. that the Chinese no longer have to smuggle the sayings of Chairman Mao into this country in fortune cookies."

NOW IS THE TIME . .

Max Smith
County Agr. Agent
Telephone 394-6851

To Control Canada Thistles

One of the most common weeds in this part of the state is the Canada Thistle; this weed is now maturing and soon the white cotton-like seeds will be blowing over the area. Land owners are urged to mow their fields before the thistles mature. I do not know of any weed that irritates people in a community more than to have the thistle seeds blowing over their property. In many cases the thistles grow on vacant property or on land not being farmed. Some real estate developers are guilty of not mowing their weeds several times during the summer. However, some farmers are also guilty of permitting patches of thistles to mature in their winter barley or wheat fields. It is not good weed control to permit them to mature and then spread them over the farm with the combine. We suggest that grain producers with these patches of thistles go in there and cut them before they ripen. Don't be guilty of broadcasting thistle seeds to other parts of your land or into your community.

To Rotate and Clip Pastures

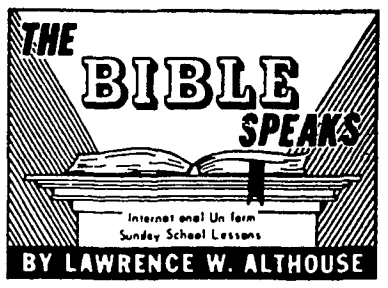
Permanent pastures should be clipped several times during the season and the first clipping is over-due; this will control the weeds, get rid of mature grasses, and permit the new growth of the desirable forage grasses. In many cases it is advisable to rotate the livestock from one area to another every three or four weeks and mow the pasture after each period of grazing. This is very important in good sheep management to reduce the danger of worm re-infestation. If there is an excess of the old pasture, it will dry and most animals will eat it along with the new growth when given the opportunity.

To Use New Grain Slowly

Small grain harvest is approaching when it might be possible to start using some of the new barley or wheat in the grain mixtures. This should always be done gradually in order to reduce the danger of digestive disorders such as scouring or bloating. New grain should be allowed a period of curing or "sweating" before going into the grain rations. When the new grain is introduced gradually from 10 to 20 per cent up to the desired 40 to 50 per cent of the entire ration, there should be little digestive disturbances. The old grain should be cleaned out of the bin, if there is any left, and the bins thoroughly cleaned and sprayed with an insecticide (malathion or methoxychlor) before the new grain is introduced. If possible some old grain and some new grains may be used in the mix at first as a means of changing over to the greater use of new grain.

To Insist Upon Farm Pond Safety

Warm weather brings swimmers to local farm ponds and we are concerned about the safety measures at these ponds. Owners are urged to have rescue equipment handy for emergency use. Items such as wooden ladders, boards, rafts, inflated inner-tubes, a rope, and other rescue equipment should be available. Swimmers should not swim alone and children should be warned of the dangers of cold water in hot weather. Liability insurance should be carried on the farm pond in order to protect the owner.



"AND WHEN YOU PRAY"

Lesson for June 18, 1972

Background Scripture: Matthew 6 1-15. Devotional Reading. Isaiah 55 1-6.

Jesus was unimpressed with the quality of prayer that he observed wherever he went. When he saw men pray, he found negative illustrations for his disciples on "how not to pray." Hypocritical religious leaders, he observed, made a great show of praying in public places. But, though they called it "prayer," it was not.

Rev. Althouse

Your father knows

Perhaps Jesus would not be too impressed with what passes as "prayer" today in many places. Prayer, for many people, is, as it was for the hypocrites and Gentiles of Jesus' day, a pious form rather than a vital transaction. Many people may "say their prayers," but they do not pray, they do not do anything more than "go through well-rehearsed motions."

The problem may be that we do not understand any better the nature of prayer than the people of Jesus' own day. Jesus told his disciples: ". . . your Father knows what you need before you ask him." Too many people seem to think that the object of prayer is to persuade a reluctant or inattentive God to bless us in some way. Thus our prayers may be attempts either to get his attention, or to persuade him that we've got a legitimate request.

Jesus, however, always prayed with the assumption that it was already God's will and intention to give him what he needed. His purpose, thus, was not to persuade God to give, but to open himself to be able to receive. Jesus did not mean that it is wrong or useless to ask, but asking is for our sake. Its purpose is not to inform or persuade God of our needs, but to enable ourselves to receive what God already wants to give to us.

Pray then like this

The problem with prayer, then, Jesus was indicating, is not a reluctant Giver, but an unreceptive receiver.

Jesus gave his disciples a model prayer after which they should fashion their own prayers. It is the style or the attitude of what we call "The Lord's Prayer," not the words themselves that are most important. In the model prayer God comes first. The prayer puts himself completely in God's hands and trusts his grace. He does not hesitate to ask specifically for his daily food or for forgiveness or from the power of evil, but he does this out of an attitude that presupposes that this is precisely what God desires to give him . . . and will give to him if he will but humbly and expectantly receive it.

What Jesus said on prayer to his disciples almost two thousand years ago, he says also to us.

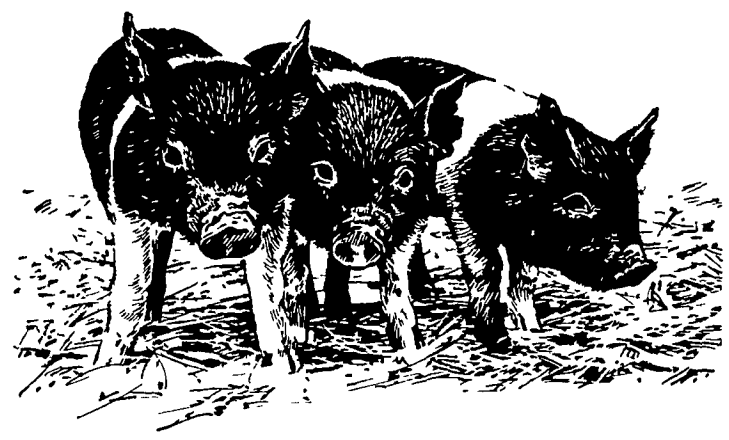
AGWAY

AGWAY CARE MEANS MAXIMUM PROFITS FOR HOG PRODUCTS



CARE IN FEED FORMULATION

You know the important thing is not the cost per pound of feed, but rather the cost per pound of gain and profit. Agway feeds, from Squealer for the baby pig, right on through the growing and finishing period, will do the job with top efficiency. The benefits to you are better health and feed conversion, lower mortality, and extra dollars.

CARE IN ANIT-BIOTIC SELECTION

Use of the Pfizer anti-biotic, Oleandomycin in Agway grower-finisher feeds means pigs grow faster on less feed per pound of gain all the way to market. Since there's no withdrawal period, you never have to switch to a non-medicated feed. So there's no slowing down as your pigs approach market weight.

CARE THROUGH RESEARCH

Every part of the Agway Swine Enterprise package is thoroughly tested before it is offered to you. You reap the benefits from work conducted at the Cooperative Swine Research Farm at Lexington, Illinois, — one of the finest in the country. The result: a more profitable hog business.

Potential New Alfalfa Pest Studied by Pa. Scientists

The Pennsylvania Department of Agriculture has initiated studies on a potential new crop pest known as the Alfalfa Blotch-Miner, it was announced by Secretary Jim McHale.

"This fly poses no immediate threat to Pennsylvania alfalfa crops," said McHale, "but has been reported to be as serious a pest as the alfalfa weevil in parts of New York State. Scientists in the department's Bureau of Plant Industry are studying the insect's life cycle now so that control measures, both biological and chemical, can be applied if the fly becomes a threat."

The secretary noted that Plant Industry personnel worked closely with an entomologist from Penn State to develop survey plans. Agriculture Extension county agents helped make the initial contacts with the alfalfa growers in Bucks and Northampton Counties. "This is the kind of cooperation that will best serve the interests of the Commonwealth's farmers," said McHale.

A Plant Industry entomologist explained that the tiny female fly, technically called Agromyza frontella, lays its eggs between the surfaces of the alfalfa leaf. The developing maggots feed within the leaf, forming a characteristic blotch mine. She also makes "pin hole" punctures for laying eggs and for obtaining food from the sap that oozes from the wounds.

The insect probably was accidentally introduced from Europe in the 1960's. In 1968 and 1969, damage by the Alfalfa Blotch-Miner was reported in Connecticut and Massachusetts. Since then there have been reports of crop damage in New York, Delaware and New Jersey.

In the fall of 1971, the Agriculture Department began making surveys in Pennsylvania. The insect was found in Bucks and Northampton Counties. The department will continue to take samples in these counties during the summer and conduct biological studies at the Harrisburg laboratory.

The entomologist said Penn State will aid in statistical analysis. Ultimately, Penn State may do more extensive research with a view toward recommending controls if the insect becomes an economic threat to farmers.

"We are conducting surveys and studies now," said Henry Nixon, director of the Bureau of Plant Industry, "because we don't want to wait for an infestation to develop so that we would be forced to become a fire fighting organization. We want answers before we get the real problem."

UEP President Calls for Action on Overproduction

Egg producers want something done about overproduction, but no one has the answer as to how the job can be accomplished. This is how Jerry Bookey, President of United Egg Producers, summed up his recent trips into various regions of the U.S.

"Everyone agrees that our number one problem is overproduction," Bookey notes. "But not everyone is agreed on how to combat the problem. Some say external forces, such as controls, are the answer while others feel industry can clean up its own house. Still others freely admit a desire to wait for an economic burnout."

Bookey said he has found many divisions and factions throughout the country, but he feels egg producers will work together once they have a defined goal and dedicated leadership.

"Many producers who have not expanded production in the last few years feel that the entire responsibility of current surplus problems should be blamed upon producers who have expanded or entered the egg business in the last few years," Bookey noted. "They fail to realize their own production efficiency, through which more eggs are being produced by the same number of hens, has added to the egg supply and many outside influences have caused a decline in demand for eggs.

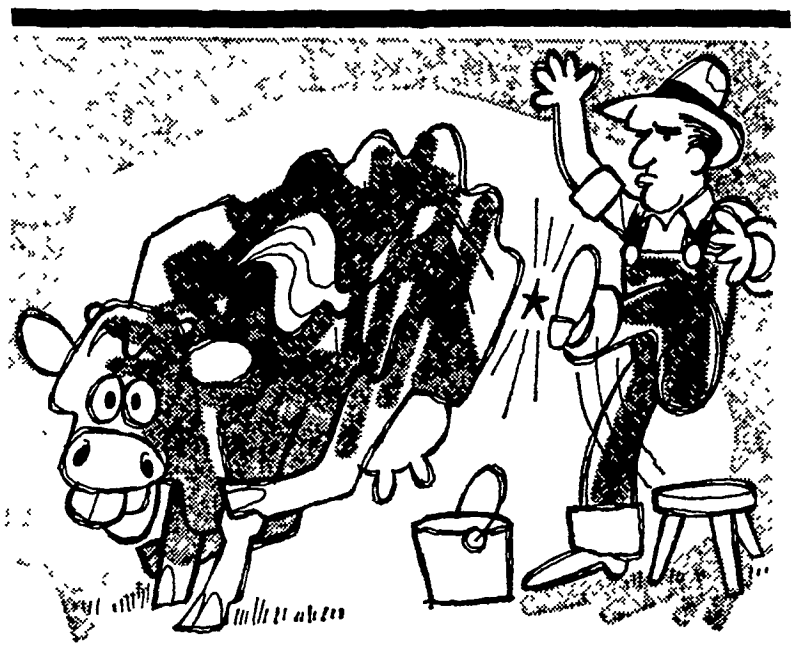
Bookey said there is great support for a national checkoff program throughout the egg industry, and there is mounting support for positive action to prevent outside capital from being invested in egg production for tax shelter purposes. Producers in all sections are becoming more conscious of new or expanding production facilities as result of outside investments, Bookey said. This new concern is in addition to the longstanding concern over the backward integration of chain stores into egg production.

In each regional meeting the U.E.P. President has emphasized U.E.P.'s four-point program: 1) price discovery, 2) promotion, 3) legislation, and 4) production surveillance and statistics. Most industry problems come under one of these four categories, he notes, and in all of them U.E.P. is active.

"Many producers are looking for anything which will offer any hope," Bookey continued. "This is the time when real leadership and clear thinking is needed. We cannot afford to jump at any false hope. The egg industry needs to study its problems with a firm knowledge of its history and then seek solutions based on the best judgments possible. We must realize that several different approaches to solving a single problem is not the answer -- we must unite our efforts for maximum benefit."

The Old Timer

"Driving is a lot like baseball—it's the number of times you get home safely that counts."



There's a better way to get her to produce...

IT'S CALLED PURINA MILK CHOW SPECIAL

You're not going to get any more milk out of that cow if she doesn't have it in her. But your cows may have the bred-in capacity to produce an *extra ton of milk a year*—with the proper diet.

That proper diet is Purina Milk Chow Special. It's a high efficiency milking ration that contains carefully selected ingredients blended together in the *right* amounts to help your cows produce all that's in them.

Start feeding your dairy cows Purina Milk Chow Special and keep an eye on your records. Prove to yourself that this high efficiency ration can return you lots of milk at remarkably low cost. In fact, many local dairymen report increases of over 2,000 lbs. milk per cow in their first year on Milk Chow Special.

Stop in and see us today. We'll give you the details on prices and delivery. You'll find us at the store with the Checkerboard Sign.

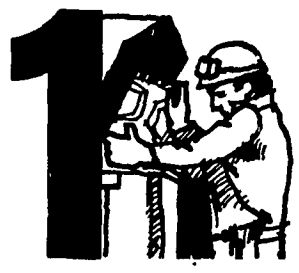
Reduce Hazards!

Follow this Rinse and Drain Procedure for Pesticide Containers

The National Agricultural Chemicals Association recommends this quick, easy procedure for draining and rinsing all single trip containers.

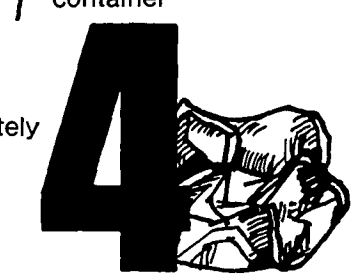


1 Empty container into spray tank. Then drain in vertical position for 30 seconds

2 Add a measured amount of rinse water (or other dilutent) so container is 1/4 to 1/5 full For example, one quart in a one-gallon container

3 Rinse container thoroughly, pour into tank, and drain 30 sec. Repeat three times Add enough fluid to bring tank up to level

4 Crush pesticide container immediately Sell as scrap for recycling or bury Do not reuse

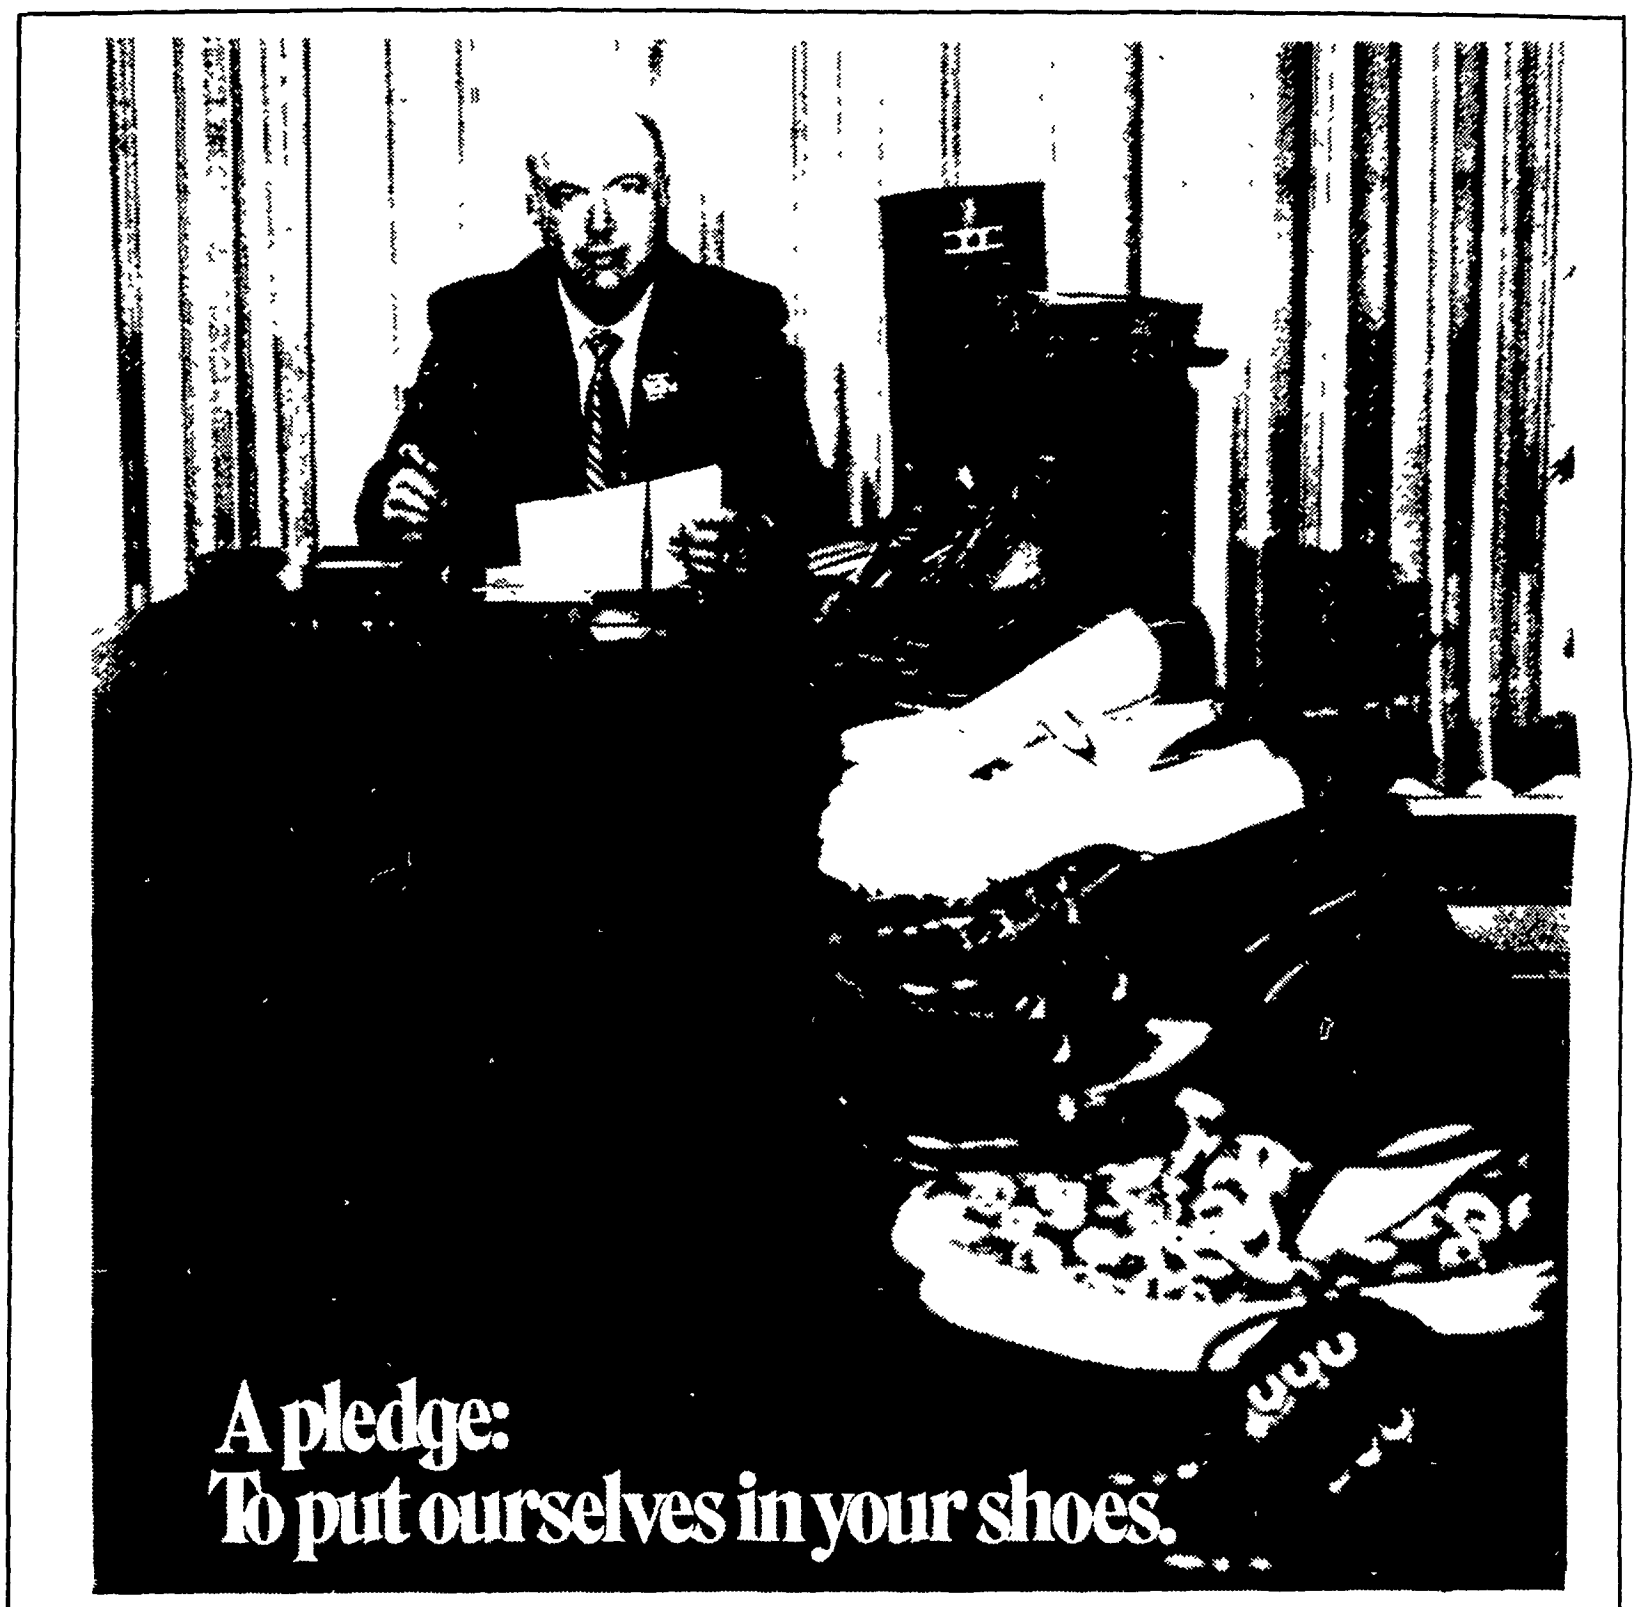


The National Agricultural Chemicals Association has prepared lablels like this one to publicize a rinse and drain procedure for pesticide containers. The procedure protects against farmstead soil and water contamination. Proper rinsing reduces pesticide concentration in containers by 1000-fold, the NACA points out.

Broiler Placements Down 5 Pct. in Pa.

Placements of broiler chicks in Pennsylvania during the week ending June 3, 1972 were 1,168,000. The placements were 5 per cent below the same week a year earlier, but 5 per cent above the previous week Average placements during the past 10 weeks were 7 per cent below a year earlier.

Settings for broiler chicks were 1,695,000 - 15 per cent below the previous week and 14 per cent below the comparable period a year earlier. The current 3-week total of eggs set is 8 per cent below the same period a year ago. Inshipments of broiler-type chicks during the past 10 weeks averaged 12,000 compared with 1,000 a year ago Outshipments averaged 266,000 during the past 10 weeks, 35 percent above a year earlier.



All the question-asking has ended Every strong opinion has been heard and noted

And now our directors and management are planning the future based on the recent findings

Those findings ranged from the frivolous and funny to the emotional and serious. The interviewees told us, not only about banking here, but about banking there and everywhere.

'Twenty-two," one fellow responded when asked his number of children Then he grinned expansively, and so did the questioner. 'Pay higher interest on savings," said a woman, who didn't know our rates are among the highest

And we breathed easier upon learning that a complaint about drive-in services concerned another drive-in window—not ours.

Before some actual changes are instituted by Farmers National Bank of Quarryville, we're making a pledge about the future:

To be a little better, a little faster than before. To remember that people's lives sometimes depend on their finances, and so to willingly advise when requested

To realize that yesterday's banking won't always do for today, but to build on the best policies of the past

In every way, to put ourselves in your shoes Because we think you want us there

Farmers National Bank of Quarryville

Banking the way you'd do it.

Member, Federal Deposit Insurance Corporation

PEMA News

President John Landis began the June 9 meeting by calling for the Treasurer's report which was accepted as presented

Due to the fact that one of the speakers had a later assignment, the business session was postponed Ben Burkholder introduced Mr Joseph Smith of the Pennsylvania Human Relations Commission and Mr Malcolm C Taylor Bureau of Employment Security

Mr Taylor - "The Bureau attempts to make certain that employment is equalized A strong attempt is being made to assist industries to equalize employment from the standpoint of minority groups

"The Bureau of Employment Security is an organization attempting to be helpful and is not an enforcement agency They are capable of making job studies and assist in preparing job descriptions that are very important They are specialists in the language field, therefore, can talk to minority groups, and develop a complete understanding

"In the event industry should insist on persons they consider neat, clean cut, and not the hippie type, they must realize that these are not part of any job description, and therefore, must be overlooked In many instances people so described may have the necessary talents needed in the performance of a specific job Industry should not advertize insisting on 'male only', when a female could fill a position The Bureau has observed that it is possible to find a female who is capable of doing most any kind of job

'The Bureau is able to institute training programs to make people available for jobs

We are totally funded by the U S Government, and are constantly aware of the fact that there is an ever greater supply of people than jobs The Bureau has an investigation division to check when labor claims unjust treatment "Complete guidance comes from the National office,

Joseph Smith

where job norms are set up If there are no norms for specific jobs, the occupational analyst will develop them

"There is a service offered by the Bureau on Social Awareness and a two day training program is available to management groups.

"Management should have complete documentation to cover any dismissal"

Mr Smith - "Should a marketing organization wish to advertise for help, they should make certain their Ad reads correctly Many newspaper editors have been trained to write Ads correctly and if they have not had such training, they can request instructions from the Human Relation Commission

The purpose of the Commission is to control discriminatory practices in hiring They are the enforcement agency for civil rights on employment, housing, education, etc The Commission represents all parties They enforce and investigate on all complaints when they originate from individuals or companies with four or more employees Migrant workers and boys working on farms do not come under Commission rules

"Every investigation must be fair and the investigator must be entirely neutral, i e , he must not side with either employer or individual

"A person to be hired must be qualified for the position and the employment agency has the right to determine just what is required for a specific job. This is why it is important to have job descriptions Difficulties always arise when expectations do not match actual practices of jobs.

"An employment agency can work toward changing the role of people performing for them Employees look upon a plant as a community of people Workers

Malcolm Taylor

are always motivated by feeling they are part of an organization.

"One must look for patterns of employment & give the same kinds of procedure to similar jobs. In every instance procedures must be consistent."

Sam Berenson indicated that a great deal of interest should be displayed in S 3419 which is attempting to put a great deal of work now performed by USDA into a new Consumer Agency. Industry should try to prevent this because USDA understands the poultry industry and a new agency may not In addition the bill is in the Commerce Committee where knowledge of the egg & poultry industry is lacking The Sisk Bill should be watched, because it is still floating around and activity may resume any time

Regis Puhl - Invited anyone not now a member to come forward and everyone should continue to sell memberships. Those who do not have pins—leave their name & for $1 a pin will be mailed.

The meeting adjourned at approximately 10:30 p.m. The next meeting will be in September

Respectfully submitted,
E J Lawless, Jr., Secretary

Co. Lamb Wins National Prize

A Dorset yearling ram won national recognition for Lancaster County owners Wednesday, by becoming reserve grand champion at the Eastern Stud Ram and Ewe Show held in Staunton, Virginia.

The home-bred lamb shown by Mr and Mrs. Robert D Herr and Family, Narvon R D. 2, then went on to sell for $300 in the national sale the following day. This selling price was the top of the day for the Dorset yearling rams

The champion ram of the show was a ram lamb consigned by Wendy Harmann of Woodbury, Connecticut and went on to bring the highest price for a Dorset in the country this year, $1500.

Carrying the local breeder's prefix, Nix Besser, the reserve champion yearling ram was first in his class of 17 prior to being named to the reserve championship

The national show and sale is held each year and features four breeds — Dorset, Hampshire, Suffolk, and Southdown. Twenty-one states were represented.

GET MAXIMUM EFFICIENCY WITH

Mol-Mix® LIQUID SUPPLEMENTS

Containing DES (diethylstilbestrol)!

Mol Mix is the ideal supplement for feedlot cattle Developed to economically balance grain and roughages for maximum feed conversion, top gains, and high dressing percentages coupled with low production costs

MOL-MIX CONTAINS:

Cane molasses
Liquid urea
Distillers solubles
Condensed fermented corn extractives
Ammonium polyphosphate
Phosphoric acid
Vitamins and trace minerals
Plus unidentified factors

Easier to absorb than solid supplements Easier to handle. Go with Mol-Mix, The Liquid Leader . Now Available with DiBESTrol for even greater efficiency.

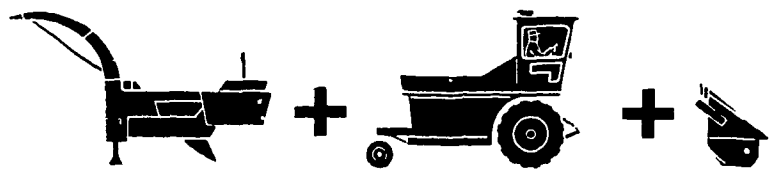
Uni-Forage Harvester.

It's got everything.

Big capacity, separate blower, competitive price—plus!



Uni-Forage Harvester + Uni-Power Unit + Windrow Pickup

This Uni-Forage Harvester is priced the way you like it Competitive with other self-propelled choppers

The separate blower means the cutter head doesn't have to double as a blower And the spout is closer to the wagon, so forage is saved on turns, in contoured fields, and in crosswinds Spout direction is hydraulically controlled

Three upper feed rolls and six spiral knives cut hour after hour with a more uniform cut, down to 3/16 of an inch. The Uni-Forage Harvester is a great chopper. And it's part of Uni-System

The system of self-propelled harvesting equipment that needs only one interchangeable Power Unit.

Uni Forage Harvester—with its big capacity and competitive price—is one of the reasons why

AVCO NEW IDEA UNI-SYSTEM

Uni-System just makes more sense!

International Farm Show To be Held in Minnesota

Farmers from all parts of the world will be coming to Vernon Center, Minnesota, September 11 - 17 to see and compete in the 1972 World Ploughing Contest, which will be one of the many features of Farmfest, U.S.A., an international farm show.

Competitors expected from all corners of the world include representatives from Africa, Eastern Europe and the South Pacific. Farmfest - U.S.A. was designated as an international trade show by the U.S. Department of Commerce and the U.S. Treasury.

The opening four days, September 11 -14, will feature the Grand National Tractor Pull in which 250 souped-up tractors will compete for over $20,000 in prizes. Forty-five national champions from 24 nations will compete in the 19th World Ploughing Contest on September 15th and 16th.

Organized in 1952, the World Ploughing Organization is dedicated to promoting peace and brotherhood among the ploughmen of the world. To commemorate the site of each year's World Ploughing Contest, a monument to peace is built.

Other farmfest attractions will include big name entertainers and political candidates. Traditionally, presidential candidates deliver a farm platform at plowing contests in election years and show officials are hopeful that the 1972 candidates will be no exception.

On September 15, the Air Force Thunderbirds will perform aerial acrobatics over the Farmfest site. On other days, horse pulling and plowing contests will be held.

Trade will be a major aspect of the event with over 300 manufacturers showing their wares on 65 acres of exhibit space. Among the 300 exhibits will be a number of Canadian, Japanese, Swedish, and German firms.

The U.S. Department of Agriculture, in a 10,000 foot exhibit, will feature the role the department plays in selling U.S. products abroad.

Actual demonstrations of farm machinery will be held daily as new models are tested on over 700 acres of crop land.

While farmers are looking at machinery, farm wives will be in a 2,000 seat Farm & Home Center watching cooking demonstrations, fashion shows, and craft lessons.

"Vinegar Bible"

An edition of the English Bible printed in 1716 is known as the "Vinegar Bible" because a printer's error made in the parable of the vineyard substituted the word "vinegar" for "vineyard."

ED ESHLEMAN'S WASHINGTON REPORT

Can one man make a difference in the modern world? I am asked that question often by people who for one reason or another have lost faith that an individual can bring about significant change in today's society.

In his travels to Peking and Moscow, President Nixon should have given new hope to those who have raised that question. While it cannot yet be said that the President has changed the world, it is apparent that he has brought the world to the brink of change. And for one man, even one as powerful as the President of the United States, that is an accomplishment worth noting.

Anyone who remembers things as they stood on our globe when the President took office can see the difference that he has made. In January, 1969 the foreign policy of our country was in shambles. The Vietnam dilemma, the Middle East crisis and our deteriorating relationships with our allies had put us in the position of being a world power with little or no influence in world events. Peace was an impossible dream because we were unable to deal with the other great powers in the world, namely Russia and China, in an effort to attain it.

But President Nixon changed the situation. Slowly and sometimes with the handicap of uninformed criticism he did those things that needed to be done before he could successfully negotiate with the Russians and Chinese on the goal of peace. He began a withdrawal from Vietnam, but one that fulfills our commitments rather than abandoning them. He worked toward cooling the crisis in the Middle East so that there was less chance of a shooting war that could produce a direct confrontation between the U.S. and the Soviet Union. And, he traveled and talked to our allies in an effort to assure them that the United States will continue its role in helping to keep the Free World free

Only then could he open the doors to China President Nixon had no illusions that traveling to Peking would result in making the Communist Chinese our friends. But ending our isolation of them meant that other nations could no longer think of the U.S.-China relationship as being non-existent. From the President's trip on, the world had to consider the possibility that we could get together with the Chinese on matters of mutual concern.

That fact increased the chances for success in Moscow. The rivalry between Moscow and Peking is well known, and the Soviet leaders were anxious to make certain that their ties to the United States were just as strong, or stronger, than those of the Chinese. Therefore, the President found a willingness to negotiate in Russia that no American President had found before.

All of this means that we once again have a working foreign policy. It is not a policy that promises instant peace, but it does make peace a possible dream. Danger still lies ahead for there is always the chance that all of the negotiations and all the hopes produced by those negotiations will break down in a moment of madness or because of some new drive to dominate the world. But today the future looks a little brighter for all of us because the United States is again in a position to exert some moral leadership. And one man made the difference.

Broiler Placements Up

The placement of broiler chicks in Pennsylvania as of June 9 went up 51,000 over the week before but the current findings of the Pennsylvania Crop Reporting Service show this to be still five per cent below the same week a year earlier

The average of the 10 most recent weeks shows 1,187,000 broiler chicks being started on the feed cycle to marketing, seven per cent behind the same indicator in 1971

The shipment of broiler-type chicks hatched in the Commonwealth for feeding and marketing elsewhere continues to run at a high level The current three-week average is 266,000, 35 per cent ahead of the same period a year ago

Eastern Co-op Officers Named At Annual Meet

On June 8, the Board of Directors of Eastern Milk Producers Cooperative held its annual election of officers at the Association's headquarters in Syracuse, N.Y. The nearly 10,000 member dairy cooperative completed their 50th Annual Meeting the day before.

Officers re-elected for a one year term were: President, Francis Cole of Ilion, N.Y.; Vice President, Dwight Burnham of Vergennes, Vt.; and Treasurer, Howard Merrill of Walton, N.Y.

George Willow of Mifflinburg, Pa. succeeded Robert Baldwin of Maryland, N.Y. Secretary of the Cooperative.

The following district directors were elected to Eastern's Executive Committee for the 1972-73 period: Harold Rotz of Waynesboro, Pa. and Alfred Wanner of Narvon, Pa. They will serve with Cole, Burnham and Merrill to make up the five-man committee.

New directors elected to the Board are Clyde Wilson of Rushville, Pa. and Cyril Filiatrault of Gouverneur, N.Y.

Mr. Wilson succeeds Mrs. Pauline Van Dusen of Sayre, Pa. who is completing her term of office. Mr. Filiatrault, a former Board member representing one of Eastern's affiliates, Allied Federated Co-ops, returns to succeed Alfred Lawrence. Mr. Lawrence is retiring.

James L. Martin Dies at Age 37

James Lee Martin Sr., 37, died unexpectedly Monday at 8 p.m., while working on his farm at Strasburg R1.

Born in Manheim Twp., he was the son of Ralph S. and Amy R. Metzler Martin, both of East Petersburg. He was a member of the Neffsville Mennonite Church and was secretary-treasurer of the Lancaster County Farmers Assn. He was a farmer for about nine years and operated an automated hog and steer farm.

Lancaster County Farmers Assn.

Membership in the Lancaster County Farmers Association reached an alltime high of 1172 reported Nathan Stoltzfus, membership secretary, at the recent June board meeting. Lancaster County now joins the majority of Pennsylvania Farm Bureau Associations who have reached their 1972 membership goals.

Statewide membership is approaching 16,000 as Pennsylvania leads the nation in rate of growth. Only several county associations have not reached goal at this date.

This is the first time in several years the the county has reached goal according to James Shertzer who chaired this year's membership drive.

Initial plans are now being formulated for the 1972 policy development sessions. The first statewide meeting will be held June 28-29 at the Embers Restaurant north of Carlisle. Meeting will be legislative and association leaders.

William Guhl, Tayloria, county policy development chairman, reports that each county has been requested to bring five issues for consideration to the state meeting.

Since this is the first stage of all Farm Bureau policy, Guhl urges any member to bring any issue of concern to farmers to him at their earliest convienience. He can be phoned at 717-529-2569.

Announcement has been recently made of a Mrs. Penna. Farmers Assn. Contest as part of the regional ladies day to be held in Reading July 19.

Any woman member is urged to consider this contest. One lady will represent the Lancaster association. Both county and regional entries will be judged on a five minute presentation entitled "What PFA Means to Me."

The women's committee also announced plans to charter a bus from the Farm and Home Center to the Reading meeting. Women's Committee member Mrs. Helen Wivell expressed hope that there would be a good turnout for both the trip and the contest. Complete details can be obtained from Mrs. Wivell. Her phone is 426-1303.

All policy holders of Farm Family Insurance will soon be receiving a visit from either of two recently hired service representatives. The program, perhaps temporary, will serve the over 200 subscribers until additional agents can be put in the field. An additional agent has been hired and is starting training

The service representatives hired are Mrs. Thomas (Patricia) Coffey and Mrs. Roy (Mary) Martin. Both reside in the Elizabethtown area and will function from their homes until office space is found.

The business analysis accountants are completing consulation of the 1971 analyses. They also have openings for new accounts.

Both the insurance and business analyses as well as the Safemark supply programs are independent self supporting operations.

In other action the board discussed the possibility of having booths at the county fairs again this year. Fairs under consideration are Solanco, Lampeter, Ephrata and Manheim.

Any member who could help organize such displays is urged to contact president James Kreider, Quarryville. Kreider stated the board position when he said, "Such displays help both farmers and the association, but will not be possible unless members in each area are willing to assist."

Plans for the annual meeting to be held October 20 at Harvest Drive Restaurant are progressing. The restaurant's new enlarged facilities will accomodate approximately 500.

A capacity crowd was served last year All details of the program including the speaker are still incomplete at this writing.

Another annual event, the county picnic, will be held at the Lampeter Fair Ground, July 29. Meal tickets will be one dollar. Additional details will be forthcoming next month

Students to Attend Co-op Institute at Shippensburg

Seven Lancaster County students have been named winners in the Cooperative Business Education Program sponsored by the Lancaster Council of Farmer Cooperatives and will represent the County at the Pennsylvania Association of Farmer Cooperatives Summer Institute at Shippensburg State College, July 9-13.

Those chosen to attend the Institute are: Richard Bollinger of Lititz, Janet Brubaker of Lititz, Lynn R. Groff of Ephrata, Wayne Kreider of Quarryville, Michael Martin of New Holland, and Delmar Weaver of New Holland, all first-year scholars, Debora Gregory of Lititz will return to the Institute as a second-year scholar.

Winners were selected on the basis of their knowledge of the cooperative way of doing business and on activities of the participants identifying them with school, community, church, and youth organizations.

These young leaders will be accompanied to Shippensburg by Jay W. Irwin, Association County Agent

The Institute program is designed to teach youth more about business in general, career possibilities in agribusiness, and to provide opportunities for individual leadership development.

Approximately 225 young adults, representing the best of over 4,000 participants in the annual P.A.F.C. youth education program, will attend the four-day event.

The Institute is a joint effort of the Pennsylvania Association of Farmer Cooperatives, local coop council, and the Colleges of Agriculture of The Pennsylvania State University.

A total of 80 local boys and girls took part in this year's cooperative program

Meat Prices — Why?

Several factors combined to bring about the recent increase in meat prices, according to the National Live Stock and Meat Board. An extremely bad winter in some livestock-growing sections of the country in '71 plus fear that the dreaded corn blight would spread brought about a temporary reduction of livestock on feed. This resulted in fewer meat animals coming to market at a time when consumer demand for meat was strong due to the increased level of income for most Americans which has been occurring over the past several years.

Ever had a stomach ache and headache at the same time? Usually you have to decide which hurts the most, so that you can take the proper remedy Relief is on the way! Scientists are in the process of "getting-it-together" with a milk-buffered aspirin, designed to cure both symptoms at the same time.

Penn Willows Club Holds Talent Show

The Penn Willows 4-H Club held its third monthly meeting last week at the Pequea Elementary School.

Following the business meeting the club held its annual talent show. The show included things like skits and plays to members playing solos and duets on the piano, flute, and saxaphone.

The last activity was a midget queen contest. Pam Cass was selected queen after various competitions took place.

Members of the cast were invited to the home of Mr. and Mrs. Robert Martin after the talent show for refreshments.

The next meeting will be a splash party at the Conestoga Pool from 8 to 10 p.m. on July 14.

News Reporter,
Sue Campbell

Strawberry Roundup

A total of nine luscious entries were a part of the annual 4-H Strawberry Roundup Thursday at the Farm and Home Center, sponsored by the Lancaster Rotary Club. Entries included three sets of brothers and sisters.

Berries exhibited by Richard Yunginger, Marietta RD1, were named grand champions of the show. These berries were later sold to Rotary Club president Samuel M. Aldoerffer for $5 a quart.

Reserve champion strawberries were exhibited by Pamela Nissley RD1. Third place winner was Kevin Ulrich, Ephrata RD1. Berries from these two exhibits later sold for $2 and $3 a quart to Rotary members.

Other 4-H'ers exhibiting strawberries were: Mary Yunginger, Marietta RD1; Dale Ulrich, Ephrata RD1; Venessa and Teressa Walter, Ephrata RD1; Dwight Houser, Lampeter, and John Shenk, Lititz RD3.

Amos Funk, Millersville RD1, served as judge for the annual event.

Merri-Maid Club Meets

The Merri-Maid 4-H Sewing and Cooking Club was called to order by the president, Joyce Houser.

The cooking group made carrot cookies and treated the group. The sewing girls cut out their garments.

The next meeting will be held from 12:30 to 3 p.m July 10 at the Martin Mylin Junior High School. The following girls will give demonstrations: Sandy Weaver, Sherri Sheaffer, Joy Harnish and Ann Reinhart.

Rough Riders Club Names Show Champs

The Rough Riders 4-H Horse and Pony Club held its annual Horse Show last Saturday at the Lancaster Riding Club grounds.

Three championship awards were presented. The winners of these awards were:

English — Beth Brewer, champion; Nancy Henkel, reserve.

Western — Renee Wenger, champion; Karen Bleacher, reserve.

Game Horse — Shirley Craig, champion; Randy Glick, reserve.

The Rough Riders 4-H Club members hope the show was enjoyable for all who participated.

Elizabethtown Pig and Rabbit 4-H Club Meets

The Elizabethtown Area Pig and Rabbit Club meeting started with a baseball game at Fairview School. Team number two had a big win.

After the game the members walked to a neighboring barn for the meeting. It was called to order by Scott Heisey, president. The members signed a card thanking Samuel Brubacker for the use of the barn and for the refreshments.

The meeting was adjourned, after which members talked to leaders about projects.

News Reporter,
Raymond Dohner

Farm Panels

A new family of interior finish products for livestock and poultry buildings have been introduced by Conwed Corp

The products, Farmpanel, are said to be cleanable

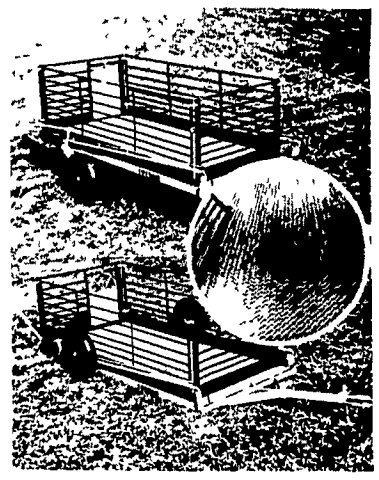
Three types of 4 x 8 foot panels are available: standard, super strength Farmpanel and fire protective

Standard is an economical interior panel which provides cleanability, brightness, and insulation.

Super strength is a high density panel with impact resistance, cleanability, brightness and insulation value

The fire protective panels have a vinyl film surface, provides insulation value, and moisture protection, and are cleanable and fire retardant

The interior surface of each product can be cleaned with a pressurized hose or sponged with soap and water or disinfectants Each resists acids and alkalies and is inert to mold and fungi



Advance Metalworking Company, Kewanee, Ill , has developed a line of utility transporters with beds that can be lowered to ground level to reduce labor costs in loading or unloading supplies or equipment

Life Time Utility Transporters have one piece steel beds, 69" wide and 12 feet long

Load capacity is rated at 5000 pounds The steel trailer bed is moved up or down by hydraulic cylinders that are actuated from farm tractors or other vehicles equipped with hydraulic controls Electric or hand operated hydraulic systems are available for use with other types of towing vehicles. The trailer is designed to be lowered or raised while hooked to the towing vehicle

The transporters can be equipped with a removable livestock rack for farm animals

Martin is past treasurer of the Lancaster County Holstein Breeders Association, member of the Penn Township Zoning-Hearing Board, and an active member of the Manheim Mennonite Church

Inter-State Milk Producers' Cooperative has a membership of 3000 dairy farmers in Delaware, Maryland, New Jersey, Pennsylvania, Virginia and West Virginia The cooperative has a 24-man board of directors The main office is located in Philadelphia, Pa

USDA Study Demonstrates VEE Vaccine Effectiveness

Tests of the vaccine presently recommended to protect horses against Venezuelan equine encephalomyelitis (VEE) confirmed that the recommended level (5,000 infections viruses per vaccination) produces immunity the U S Department of Agriculture (USDA) reports

In the tests conducted at Denver, Colo , by veterinary scientists of USDA's Agricultural Research Service (ARS), 10 vaccinated horses were exposed to virulent VEE virus 14 days after vaccination at the recommended level None of the exposed horses showed clinical signs of illness

Following vaccination, only a slight elevation of temperature for one day was noted

In another group of horses vaccinated with one-tenth the recommended dose, only 80 percent were protected from VEE when exposed to the virulent virus This substantiates the necessity of using the full recommended dose of vaccine virus, the ARS scientists emphasized

Growing Degree Days

Growing degree days for the week ended June 12 in Lancaster County totaled 575 at 50 degrees (35 degree days less than normal) 1202 at 40 degrees (58 less than normal), according to the Pennsylvania Crop Reporting Service

Degree day computations started April 1 They are designed to help farmers gauge crop performance and to determine suitable times for pesticide applications

Temperatures for the week ranged from a high of 84 to a low of 41, and averaged 64 degrees The normal average temperature for the period is 69 degrees

Rainfall for the week measured 0 05 inch, which is 0 82 inch less than normal Since April 1, 8 85 inches of rain had fallen on Lancaster County, which is 0 13 inch less than normal

USDA Reminds Egg Handlers Of Registration Deadline

As the July 1 deadline for registration under the Egg Products Inspection Act nears, U.S. Department of Agriculture officials report that many egg handlers have yet to register.

Registration applications have been received from about 6,000 egg handlers, but the Department estimates a total of 10,000 - 12,000 egg handlers should register

Registration is necessary for the USDA to administer the shell egg phase of the Egg Products Inspection Act. This part of the Act, which becomes effective July 1, 1972, controls the disposition of "restricted eggs"—checks, dirties, leakers, incubator rejects, inedibles and loss eggs. (The first part of the Act, which went into effect July 1, 1971, requires that all egg processing plants operate under a necessary USDA inspection program.)

Businesses that must register are: 1) All plants grading shell eggs for retail stores, restaurants, institutions, bakeries, or food manufacturers; 2) producer-packers with more than 3,000 hens who pack eggs for the same outlet; 3) and all hatcheries.

After July 1 State or Federal officials will check egg packers at least every three months to see that they are complying with the law. Other persons who transport, ship, or receive eggs will also be checked periodically.

To comply with the law, packing plants must denature or destroy for human food purpososes at the plant all restricted eggs except checks and dirties. Properly labeled checks and dirties may be sent only to a USDA-inspected egg breaking plant, for special handling and processing.

Registration application forms and information were distributed to all known shell egg handlers early in April. Businesses that have not returned the forms are urged to do so promptly to meet the July 1 deadline.

Any egg handler who has not received the forms should contact the State department of agriculture or write to: Poultry Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250.

Elizabethtown FFA Elects Officers

The Elizabethtown FFA elected officers for the 1972-73 school year The new officers are

Robert Gruber, son of Mr and Mrs Elmer Gruber, Bainbridge RD1, president, Kenneth Mummau, son of Mr and Mrs. Paul Mummau, Elizabethtown RD1, vice-president; George Hostetter, son of Mr. and Mrs. Robert Hostetter, Elizabethtown RD3, secretary, James Gruber, son of Mr. and Mrs. Raymond Gruber, Elizabethtown RD3, treasurer, Raymond Dohner, son of Mr and Mrs Victor Dohner, Elizabethtown RD1, news reporter, Marlin Gruber, son of Mr and Mrs Raymond Gruber, Elizabethtown RD3, sentinel, and Fred Halbleib, son of Mr. and Mrs Frank T. Halbleib, Bainbridge RD1, chaplain

The officers are appointing committees and planning their program of work for next year. The first event they participated in was the Lancaster County FFA Leadership Training Conference at Penn Manor High School

Dairymen Still Waiting for Money from Bankrupt Dairy

Payment by the Milk Marketing Board of some $200,000 to milk producers who are owed money by the bankrupt Clemo Milk Corporation has been held up because of legal complications, according to Pennsylvania Secretary of Agriculture Jim McHale.

McHale, noting that the Agriculture Department has no direct control over the Milk Marketing Board, said he inquired about the status of the $200,000 appropriation because "we are very aware of the hardship this entire situation has created for state milk producers."

The Clemo company, a New York dairy, and its subsidiaries declared bankruptcy Sept. 17, 1971. About 100 Pennsylvania milk producers had sold milk to the firm and were owed money. The Clemo company had been bonded for $200,000 under the Milk Marketing Law. However, because of the long range maturity of the bond and the low interest rate, the actual value of the bond was $40,000 when the firm declared bankruptcy. Thus, the bonding was insufficient to pay the farmers.

The Pennsylvania legislature then appropirated $200,000 to the Milk Marketing Board for payment to the Clemo creditors.

Harry E. Kapleau, chairman of the Milk Marketing Board, in reply to a query from McHale, said legal obstacles have held up disbursement of the appropriation.

Kapleau said he has asked Attorney General J. Shane Creamer for a legal opinion on the matter. In the meantime, Kapleau said he is contacting all affected producers and advising them about the progress in distributing the appropriation to them

The Good Old Days?

How would you like to have livestock and meat prices rolled back to where they were 20 years ago? Sound good? But what about rolling back income as well? The average breadwinner, while paying some 30 percent less for meat would find that his take-home pay had been cut to less than half of what it is today! On the other hand, livestock producers would be getting very little less than they are today . . . since cattle and hog prices have increased only 20 percent in the past two decades. In the same period personal disposable income of the average American consumer has increased 149 percent.

Shoppers Resisting Pollutants

Chicago (NFS) – A growing concern for environmental preservation is bringing about some startling attitude changes among homemakers, reports Mrs. Pauline Church, home service advisor for a leading manufacturer of plastic housewares.

"These changes first became apparent in supermarkets as shoppers began to resist packaging materials and techniques they regarded as potential disposal problems," she noted "And some food processors have responded – at least, to a degree – with more acceptable substitutes"

Now there's a rising chorus of objections to automatic dishwashers and garbage disposers as "excessive water users," "contributors to sewage system overloads," and even "unnecessary noise pollutants," she observed

WHILE NOT necessarily agreeing with such strong condemnations, Mrs Church does admire the current trend toward doing some things the "old-fashioned way" – within reasonable limits of time and budget, if not those set by landlords or local plumbing codes that may still forbid installation of certain appliances.

One result of the trend is that many practical Polly-Flex kitchen accessories made by Republic Molding Corporation, the Chicago firm Mrs Church represents, are enjoying renewed popularity, especially among younger homemakers with above-average concern for community as well as family welfare

"Such items as sturdy dishpans, color-coordinated drainboards, and dish drainers that were nearly 'obsolete' a few years ago are very much in demand again," she explained

ONE REASON seems to be that, even where there is an automatic dishwasher, the owner may be reluctant to use it more than absolutely necessary Dishes and utensils used in cooking or baking can be immersed in a pan of sudsy water as she goes along, then quickly washed, rinsed, and left to dry, rather than allowed to collect

Given a little time to soak, even messy cooking utensils don't pose a major clean-up challenge, she finds

Two Book Cows SNF Recorded

Two cows in the Roy H. and Ruth H. Book herd, Ronks, have been listed in an official production testing report released by Holstein-Friesian Association of America. Included with the pounds of milk and butterfat are the amounts of solids-no-fat (SNF) produced since last calving.

The animals and their actual production levels are:

Roaring Maples Dusty Dee 6517204, five-years-old, 18,080 pounds milk, 775 pounds butterfat and 1,568 pounds SNF in 305 days, Roaring Maples Ivanhoe Betty 5782892, seven-years-old, 22,350 pounds milk, 752 pounds butterfat and 1,835 pounds SNF in 305 days.

Jerry and William Arrowsmith

City Folks Become Dairy Farmers

"I never saw a cow till I was 12 years old," says Mrs. William (Geraldine) Arrowsmith of Hillacres Farm on Arcadia Trace, Peach Bottom RD1. She was born and raised in The Bronx, N Y., and her husband was born in New York City. They have been farming 24 years. They now own and operate a 150-acre farm with a fine Jersey herd of 90 animals, 50 of them milking cows.

Arrowsmiths are avid milk users, as "Jerry" will testify, "We serve milk every meal. We all drink milk We also use lots of butter, cheese, sour cream and ice cream The ice cream truck comes in every two weeks and we buy ten dollars worth at a time. I'm sure we're some of his best customers " We think they have something here. Surely it behooves every dairy farmer's family to use all the milk and dairy products they can.

Mrs Arrowsmith says "We have worked with Holsteins and Guernseys, as well as Jerseys, but we prefer Jerseys."

They came to this farm in Fulton Township in 1959, which was owned by Mrs Margaret Gatchell and three daughters. They farmed for them five years, then bought the farm. There have been registered Jerseys on this farm since 1885 when Charles S Gatchell farmed there. He sold a lot of bulls He bought the farm in 1859. His son, Harlan started farming there in 1912.

Mrs. Arrowsmith says "You can be self sufficient on a small farm with Jerseys because they eat less " They have shipped their milk to Turkey Hill Dairy since 1966. Turkey Hill features an all-Jersey low-fat milk. Jerseys have the largest part of solids-not-fat in their milk.

Arrowsmiths' animals are all from registered stock but they have not registered quite all of them.

Harlan Gatchell was one of the first local dairymen to have silos. Something of interest was that he built two wooden silos inside his barn Part of these silos can still be seen inside their barn. He also built one later outside the barn. Another unusual feature of this farm is a woods adjoining the pasture with an open gate for the cows to go to during the heat of the day. Cows, as well as people, seem to enjoy a shady spot to relax in.

Arrowsmiths have made several improvements on the farm. They built a 20 by 60 foot silo and a 1-⅝-acre pond which is as deep as 12 feet in one end and holds 1,500,000 gallons of water. It is fed by Puddle Duck Creek and several springs. It has some fish in it and occasionally they swim in it. It is a real fire protection to their buildings. They have a long macadam lane to their farm. They recently added a new living room to their house.

Mrs. William Arrowsmith does the farm accounting.

Arrowsmiths have no help outside their family They work with neighbors in harvesting, trading wagons, cutting hay and silo filling. They raise corn, alfalfa, Sudex for green chop, mixed hay and barley.

They have six children. Stephen took the academic course and graduated from Solanco High School in 1969. He played guitar in school.

Steve was in the 4-H Dairy Club 8 years and served as president one year. He had two Jersey cows he showed and received many awards. He has over a dozen trophies. He showed "Hillacres Milkboy Penney" and her daughter "Eggnog", both bred and raised on Arrowsmiths' farm. He received Junior Breeder award several years in the 4-H District Show. He placed fifth in 1965 and sixth in 1966 for production through the National Jersey Cattle Club in Columbus, Ohio and won a Jersey cow trophy. These awards are based upon DHIA records. Penney was Junior Champion in the state in 1962 and Eggnog was Reserve Senior Champion in 1968.

Steve took Master Showman and Fitting with Penney at District shows several years and with Eggnog at local, district and state shows Penney was top Jersey in the County 4-H Shows five years or more. Steve is now a route man for Pepsi Cola and lives in Lancaster.

Penney and Eggnog are still in the family herd. Penney, as a five-year-old, produced 16,035 pounds of milk and 814 pounds of butterfat in a 301 day lactation. Now, as a 12-year-old with two months to go till freshening, is producing 40 pounds a day. Eggnog is milking 60 pounds a day at present. Arrowsmiths have done some line breeding from Penney. Most of her offspring were bulls and were raised for breeding purposes for their herd and some were sold to local dairymen.

Brian took the academic course and graduated from Solanco High School in 1970. He, likewise, was in the 4-H Dairy Club about six years. He had three animals and received some blue ribbons. He went to Catawba College, N.C. one year, worked at Host Corral Resort and Country Club from last summer till this April and has been working at home since. He is going to take a two year course in food management at the State University of New York at Cobleskill, N.Y., starting this fall.

Matthew is seven years old and in third grade at Fulton Township Elementary School. He helps feed hay, sweeps and limes the stable, puts milking machines together and bring it in to use. He is a very capable boy.

The three younger children are Sarah, four years; Tommy, three years; and Helen, two years. There is quite an age gap in the children but Jerry says "I'm really enjoying the children."

Jerry helps milk morning and evening and helps with the barn work and washing up. She spends about four hours a day doing chores at the barn. She used to help crush hay and drive the tractor to hay wagons before she had small children. She does all the farm accounting, keeps records for federal and state income tax and pays the bills.

Jerry had one year in business college in New York City after graduating from high school. She worked for Birds Eye division of General Foods in New york, then in a paper mill office in Hollyoke, Mass. Later she worked as a secretary in the New Bolton Center lab. in Kennett Square.

Bill took Ag in high school and wanted to become a veterinarian. He spent the summers on a dairy farm in the Catskills. He had no farm background except his grandmother's people raised sheep and pigs in Ireland. After serving two years in the Navy he went to the State University of New York, Agricultural and Technical College at Cobleskill, N.Y. for two years. He worked on large dairy farms in Pawling, N.Y.; Hollyoke, Mass. (Jerseys); High Lawn Farm in Lenox, Mass.; Saddle Back Farm in Dorset, Vt.; Bill Balderston's farm at Exton, Pa. (125 Holstein cows); and at Hill Girt farm at Chadds Ford (Guernseys) before coming to his farm in Lancaster County Jerry says "Of all the places we've lived, the people of Lancaster County are the friendliest and the most helpful.

Jerry Arrowsmith making pies for the family.

Bill was a Sea Scout as a boy and Jerry was a girl Scout for five or six years. She was a second class Scout, a Patrol leader and treasurer. They have continued in their interest of community organizations. They were members of Patterson Grange in Patterson, N. Y. and of Putnam County Pomona Grange before coming here. They have been members of Fulton Grange for almost 12 years where Mrs. Arrowsmith served one year as Flora and William was one of the institutional representatives when Boy Scout Troop 330 was organized. Recently he has been serving on a committee opposing the building of an atomic plant in the area.

Mr. Arrowsmith is a member of the Pennsylvania Farmers Association and of the Solanco Young Farmers and served as treasurer at one time. He is also a member of the Pennsylvania Jersey Club.

They were active in Fulton Township P.T.A. when the older boys were in school and Jerry served as program chairman.

Mrs. Arrowsmith has been a member of Farm Women Society 21 for nine years and served as treasurer two years. This Society has 30 members and have evening meetings once a month. Mrs. Richard Woods is president.

She is a member of Little Britain Homemakers Club. They meet monthly and learn to do all kinds of crafts. Jerry says she enjoys this group and the Farm Women group of women because you get to meet with different women.

Jerry was a leader of the 4-H Sewing Club in Fulton Township 1962-1963. She makes dresses for herself and daughters and made coats for the boys. She also makes curtains and draperies. Professionals taught her to make draperies.

Arrowsmiths are members of Saint Catherine's Catholic Church in Quarryville where Jerry belongs to the Parish Council of Catholic Women. She served as program chairman in the past. She helps when they have things like bazaars, card parties and bake sales.

Jerry's hobby, besides sewing, is swimming. She says "I have a desire to swim across the Susquehanna River. Also I have a burning desire to play a banjo." She hopes to take lessons when the children are in school. She sang in her high school chorus and in her church choir.

Bill's parents, Mr. and Mrs. John Arrowsmith, live at West Palm Beach, Fla. but spend the summers in Arrowsmith's tenant house.

Jerry is of Polish and German descent. Her father, Joseph Bailer, lives in New York City. Jerry says she enjoys to cook very much. She used to bake white and whole wheat bread. She does a lot of baking. She freezes

blueberries, strawberries and grape juice for making jams and jellies in the winter time. Here are some family favorite recipes. The first one is Polish or Hungarian.

GOLOMKI
Cabbage Rolls

2 eggs, beaten lightly
1½ pounds hamburg
1½ pounds ground fresh pork (shoulder)
1 cup uncooked rice
1 qt. can tomatoes
1 No. 2½ can sauerkraut
3 medium onions, chopped and sauted lightly
2 large heads cabbage (winter cabbage preferred)
1 teaspoon salt
⅛ teaspoon pepper

Simmer cabbage heads in a little water till leaves soften. As they soften, pull off leaves. Cut base of hard thick vein out of cabbage leaves. (Makes a V in leaf).

Mix pork, hamburger, rice, onions, seasonings and eggs together. Take large rounded tablespoon of mixture and put in center of each leaf. Roll it up, tucking in ends of cabbage leaf to keep meat inside. Put in large pot. Make a layer of cabbage rolls, 1-3 of tomatoes and 1-3 of sauerkraut and liquid. Make three layers. Bring to boil. Simmer 1½ hours on top of stove on slow heat. Check to see there is enough liquid during cooking.

xxxx

Kruschicki
Bow Ties

9 egg yolks
2 tablespoons sugar
Approximately 3½ cups flour
½ pt. sour cream
1 tablespoon sweet cream or milk

Beat egg yolks, add sugar and sour and sweet cream together. Start with 2 cups of flour, add to mixture. Knead dough with hands and continue adding flour until contents blister and snap. Roll dough thin on floured board. Cut diagonally into strips 1½ inches wide and three to five inches long. Make small slit in each rectangle. Pull one end through slit in center, to make bow tie. Have oil in skillet about three inches deep and heat to 375 degrees F. Fry a few bow ties at a time, a few seconds on each side. Drain on brown paper. When cool sprinkle with powdered sugar.

Serve with ice cream, fruit or serve alone.

xxxx

Harvest Soup

Cook ham bone with some meat on it in three quarts water for one hour. Remove bone and reserve chopped meat. Chop meat
½ head cabbage, chopped
2 to 3 chopped onions
2 to 3 stalks celery, chopped
4 medium potatoes, diced
1 quart tomatoes
1 pint sour cream

Cook all vegetables in ham broth about one hour. Add ham pieces.

Take 1-3 cup flour and make thin paste with water. Take some of hot broth and mix in the paste and add to soup.

Add a little of broth to sour cream and stir. Add to soup. Just bring to a boil but don't boil.

xxxx

Almond Crust Cherry Cream Pie
8 inch shell

1-3 cup slivered almonds

Put almonds on the unbaked pie shell and bake at 400 degrees till done.

Filling:
2 cans condensed milk
2-3 cup lemon juice
1½ teaspoons vanilla
½ teaspoon almond extract
1 cup whipping cream, whipped

Mix condensed milk, lemon juice and flavorings until it thickens. Fold into whipped cream. Spoon into baked, cooled shell and chill.

Cherry Glaze: (Can use prepared cherry pie filling instead)
2 cups canned sour cherries, drained or slightly cooked fresh cherries
2-3 cup cherry juice
¼ cup sugar
1 tablespoon cornstarch
2 to 3 drops red food coloring, if desired.

Blend cherry juice with sugar and cornstarch over low heat, stirring constantly, until thickened and clear. Add cherries and food coloring and spread over cream filling and chill.

Homemakers Want Carefree, Durable Textile Products

USDA's Statistical Reporting Service, in a study of buying habits and attitudes toward natural and manmade fibers, found homemakers preferred easy care and durability in sheets, blankets, room-size rugs, and tablecloths.

Although they bought mostly cotton sheets, homemakers were especially concerned about ease of care regardless of the fiber. Comparing all wool, all cotton, and all synthetic blankets, wool, while considered durable, rated lowest because it shrank and couldn't be washed.

When it came to curtains and draperies, most respondents seemed to favor fiberglass for living rooms.

All-acrylic, all-nylon, and all-wool were preferred for room-size rugs because they looked good for a long time and were easy to care for. All-acrylic received the top marks for use in bedroom scatter rugs with all-cotton the favorite in the bath.

Cotton was the leading fabric reported purchased as yard goods for sewing at home.

Fix-It Tip

Caster wheels on heavy furniture make moving the pieces easier. The wheels can be mounted in either a rigid or swivel frame. The wheel moves only backward or forward in a rigid frame. A swivel caster, with the aid of ball bearings, turns in a complete circle. Swivel casters are more expensive but worth it in versatility.

Ladies, Have You Heard?

Doris Thomas

Extension Home Economist

Cool Surface Cooking Units Now on the Market

The newest kitchen cooking appliance on the market is the "cool surface," drop-in counter range. The surface of the range stays cool and only the cooking utensil and food inside it are heated.

The new concept in cooking works on the principle of induction heating. Foods are cooked when a high frequency current passes through coils underneath the ceramic cooking surface. This generates a magnetic field which induces a high frequency current in the pan and causes it to heat.

The unit actually stays so cool you can place a pan of water to boil over a paper napkin and the napkin won't even be singed. The heat from the pan itself is the only heat you'll ever find on the range top

Another advantage to this new unit is that cooking starts and stops almost immediately. You can only use pans made of magnetic materials such as iron and steel, cast iron, porcelain-coated steel and steel laminates—not aluminum, copper, glass or ceramic utensils.

Because the smooth ceramic top is crevice free, it's easy to keep clean. And spills will never burn on the unit.

Controlling the temperature of the units on this cooking top is made more exact with a slide-rule type control. Once you select a temperature, the food will be kept at that degree. When you aren't cooking, you can use the range top as extra counter space or as a cutting board.

Because this new unit is new, it's cost is high. But it may well be the cooking appliance of the future.

Home Fires are Possible

It's not a pleasant thought, but a fire in your home is a possibility. The best insurance against a home fire is caution. The second best is a fire extinguisher.

When you shop for an extinguisher look for the compact, dry chemical-type that's recommended for flammable liquid and electrical fires and has the UL seal of approval. It will also douse flames on wood, fabrics and paper. Then you can add water to squelch burning embers. The dry chemical agent is non-toxic, too. And you can sweep the excess away with a broom

A fire extinguisher won't do much good unless it's within each reach If you have a two-story home, you should have an extinguisher on each floor Install it on a wall where it's within easy reach from all rooms.

Make sure that every member of your family knows how to use the extinguisher—just in case a fire starts when no adults are home. If someone is alone in the house, he should call the fire department first. Then try to use the extinguisher. If two or more people are present when a fire starts, one should call the firemen while the others use the fire extinguisher.

Remember—don't depend on putting out a fire with makeshift devices. And don't rationalize by saying "it can't happen to me." It can. A fire happens to someone in this country every two minutes. Be ready if your turn ever comes

Tour Planned By State Farm Women

Plans for a State Farm Women's tour to Amsterdam and the Holy Lands were announced at a recent meeting of the executive board of the Lancaster County Farm Women's Society.

The tour, which will be conducted September 19-October 10, will include a flower show in Amsterdam. Those interested should contact the tour leader, Mrs. Wilbur Erb.

Board members approved a $10 donation to the Dairy Princess Pageant, which was held Thursday in the Farm and Home Center.

Mrs. Aaron Denlinger, county president, noted that Camp Easter Seal is accepting S & H Green Stamps to buy camping equipment. Those interested should send stamps to Mrs. Paul Witman, Mount Joy RD2

Persons interested in knitting sweaters for the Red Cross are asked to contact Richard Barr for details.

The next meeting, open to all Farm Women members and their families, will be a picnic held August 2 at noon, with the place to be announced later.

Ida Risser

Our lawn looks unbelievably nice these days compared to early Spring Ken recommended rye grass for all the bare spots and now our young son mows it regularly so that it is a fitting "backdrop" for our old-fashioned pink roses and the bright orange poppies.

When the creek in front of our house is stirred by a stiff breeze and the sun dances on the water, one is tempted to think we have a beautiful spot of God's earth.

Of course, we must look the other way when it comes to all the mud which the cows and tractors drag around due to the rainy weather. When July and August bring us dry periods we will wish for some of our present moisture that keeps us from baling hay.

xxx

I've had some pleasant visits recently with old friends who I hadn't seen for almost 20 years It is delightful to share experiences and renew an old acquaintance.

I'm reminded of a story from my youth. You see as a 16 year old, I had a classmate who was ill a long time with a heart condition. It seemed there was always something to keep me busy and so I put off going to visit this friend.

One day I took a big bouquet of flowers and drove to her home. There her mother met me on the porch and said "How happy she would have been to see you but she died this morning"

I don't remember how I managed to drive home but this was a very upsetting experience which I'll never forget.

So if this tells you anything, I hope it is to visit your neighbor or friend who needs you and don't be too busy with work which will wait till tomorrow.

I think even the word "procrastinator" has an ugly sound.

Fish Moves on Land

The climbing perch is a renowned land traveler. A native of Asia and Africa, it possesses special breathing equipment which permits it to leave the water and journey overland in quest of a new place to live. To move about, the fish has unusual gill covers, which it uses much like crutches.

Farm Women Societies

Society 2

Farm Women Society 2 met recently at the home of Mrs. Ronald Gordley, Lititz. Co-hostess was Esther Petticoffer, Lititz.

James Gordley gave a slide illustrated talk prior to the business session which was conducted by Elsie Witmer, vice president.

Announcement was made that the County Executive Board picnic will be held on August 2.

Six members of the group will entertain at Conestoga View. They are Arlene Strickler, Elsie Witmer, Louella Low, Sarah Kline, Elizabeth Shank and Edith Kaner Society 2 will supply prizes for Bingo at the Home.

Next meeting of the group will be held at the home of Beulah Graybill, Manheim. Ruth Waltz will serve as co-hostess.

Society 5

Farm Women Society 5 met at the home of Mrs. Clyde Weaver, 2342 Leabrook Road, Manheim RD Devotions were given by Mrs. Weaver.

Mrs. J. G Longenecker, president, reported the following volunteer work was done by members in the past few months: sewing at Lancaster General Hospital; working at various duties at the Cancer Society Headquarters for several days; sewing Cancer pads; donated cookies for the USO: donated S & H stamp books for purchasing a boat at a childrens camp.

She reported that the Mental Health Association is desirous of increasing new membership.

Harry Redcay, Millersville, entertained with slides on wildflowers.

The next meeting will be held at the East Petersburg Church of the Brethren at 7:30 p.m. Thursday evening, June 29. There will be an auction of baked goods and members of the Society are to bring their favorite dessert for auction. Also, the refreshments for the evening will be a covered dish snack or dessert.

Society 11

Farm Women Society 11 entertained the members of Farm Women 25 recently at a covered

YOUR COWS NEED THE BEST!

Red Rose Test Cow Feeds

Your cows need the best and these are the best dairy feeds we know how to make. There is a Red Rose 14, 16, and 18 — Test Cow Feeds — to fit your needs. Can be fed in all seasons and are excellent for keeping appetites high even during warm periods. Many dairymen prefer them because of their coarse granular texture. They are high in fat, minerals and protein, very palatable and made from top quality grains and proteins. And they're part of Red Rose's Doubt Remover dairy program that takes guesswork out of your work and helps put in profit. Ask us about it. It's free!

dish dinner. Devotions were conducted by Mrs. Loren Bucher, vice-president.

Mrs. Robert Holtzhauer gave a slide presentation on Alaska where she spent a year in volunteer work for the National Mission Board of the Presbyterian Church.

Guests at the special affair included also county officers.

The business meeting was called to order by Mrs. F. Huber, president.

The next meeting of the Society will be held at the home of Mrs. William Johnson, Oxford, the last Thursday in June.

Society 13

Farm Women Society 13 met at the home of Mrs. John Miller, Lincoln Highway East. Mrs. Claude Miller and Mrs. William Schroder served as cohostesses. Mrs. Claude Miller was in charge of devotions.

Members responded to roll call by naming their favorite pie.

Mrs. R. Eugene Hummel, president, presided over the meeting. The Society voted to donate $50 for the County project, the LARC program.

Plans were finalized for the bus trip to Ocean City, N.J., July 15. Reservations can be made by contacting Mrs. Isaac Koser, 403 East Clay Street.

Mrs. William Schroder gave a report on the recent executive board meeting. She announced that persons interested in knitting sweaters for the Red Cross are asked to contact Mrs. Richard Barr for details. She also reported that the State Farm Women tour to Europe and the Holy Lands is planned for September 19 to October 10. Those interested should contact Mrs. William Erb.

Harry Redcay, Millersville, provided the entertainment showing picturesque slides of the wildflowers of Pennsylvania accompanied by an explanation of each.

Society 29

Farm Women Society 29 entertained Society 12 members at the Elizabethtown Church of the Brethren recently. The program featured the four seasons of the year.

During the business portion of the meeting Mrs. Eugene Wenger was installed as a new member.

Hostesses for the evening were Mrs. Harold Enders, Mrs. J. Robert Herr, Mrs. Jay Bixler, Mrs. Larry Sawadsky, Mrs. Dennis Drager, Mrs. Robert Denlinger, Mrs. Jack Garner and Mrs. Eugene Wenger.

Society 21

Farm Women Society 21 held its June meeting at the home of Mrs. John DeLong, New Providence. Assisting her as cohostesses were Mrs. Frank Aument, Mrs. Grayson Cooper and Mrs. William Cooper.

The president, Mrs. J. Richards Wood, presided over the meeting. Two ways to serve the community were put before the members: the Red Cross has asked for volunteers to knit items for veterans, and donating trading stamps for camping equipment was also asked by the Easter Seal Society.

Mrs. Joseph Best, Holtwood, president of Society 20, presented an arm chair tour of seven European Countries.

The next meetint will be in the form of a family splash party at the home of Mr. and Mrs. Harold Graybeal, Peach Bottom RD1, on July 13.

Society 22

Farm Women Society 22 held its June meeting in the form of a Road Rally. Members met at Mellinger's Mennonite Church where they were assigned to teams and given directions to follow to an undisclosed destination.

The teams left at five-minute intervals and were required to obtain certain information along the way. The winning team was the last one to start and included: Vi Weller, driver, with Gwen Martin, Betty Landis and Ann Ranck as co-pilots. The destination was the PP&L Recreation Area near Marticville. A picnic lunch was enjoyed, including punch, coffee

and home-made ice cream furnished by the hostesses, Millie Landis, Claire Hess and Vi Weller

A business meeting was conducted by Pat Landis, president Devotions were led by Vi Weller Ann Diller reported on the Spring Rally at Seven Springs

A motion was made to donate $100 to the County Project, LARC It was also decided to order the fifth edition of the Society's cookbook, "The Dinner Bell"

Society 22 and Society 26 will be in charge of ushers for the County Convention to be held at the Lancaster School of the Bible Auditorium on November 4

The Lancaster County Farm Women annual picnic will be held at noon August 2 Each person is to bring a covered dish Beverage will be provided

The next meeting of Society 22 will be held at the home of Margaret Lefever at 7:30 p m. August 8. The program will consist of a food and vegetable auction

Society 25

Farm Women Society 25 met last week at the home of Mrs. Richard Gregory, Conestoga. Fifteen members and two guests were present. Mrs. Glenn Nauman was in charge of the devotions

The gift of the month was received by Mrs. Richard Gregory.

Mrs John Metz, president, conducted the business meeting.

For the program the group toured the ceramic operation of Mrs Howard Cramer, Marticville. The different processes of making ceramics were shown and explained.

The next meeting will be held Saturday, July 8 at 1:30 p.m. at the home of Mrs. Joseph Breneisen, Conestoga RD1. Each member is to bring their own bag lunch, lawn chair and anything they would like to do during a gabfest.

xxx

If you're a bride-to-be planning a new kitchen, here's a list of kitchen utensils you'll use almost every day: A set of measuring spoons, set of measuring cups for both dry and liquid measurements, set of mixing bowls, a flour sifter and a strainer Don't forget knives for paring, slicing, utility and bread. Include a rotary beater, wooden spoon and a long-handled fork on your list A spatula, pancake turner, slotted spoon, ladle, tongs and a potato masher will all come in handy You'll need a chopping board, funnel, graters, colander, pastry brush, minute timer, potato peeler, can opener, bottle opener and corkscrew. You'll also need saucepans with covers in 1-, 2- and 3-quarts sizes and baking dishes or covered casseroles in 1- and 2-quart sizes A double boiler, a heavy skillet or frying pan with a cover, a roasting pan with a rack, cake pans in round, square and tubular styles, pie pans, baking sheets, coffeemaker, toaster and a salad mold will also help make meal preparation easier for the new homemaker

Try Gouda Cheese

Gouda cheese, the red-waxed coated cheese, has a mild, nut-like flavor that is delicious when you serve it with fresh apples for a light afterdinner dessert. Extension consumer specialists at Pennsylvania State University say that gouda cheese also makes an excellent centerpiece for a snack tray of varied cheese slices and mixed crackers.

Women's Clothing Sizes Not Standardized

The National Bureau of Standards has made clothing standards for sizing children's clothing available to manufacturers. Mrs. Ruth Ann Wilson, Extension clothing specialist at Pennsylvania State University, says this sizing is based on studies of body measurements considered to be average for particular ages. However, she points out, that sizing is not standardized in women's wear. That's the reason many women wear different sizes in different brands of clothing.

Happy Homemaking

By BARBARA BAKER

When putting in a hem for a girl of grade school age or younger, make a knot every eight inches or so. If the hem rips out, you only have the area between the knots to repair This also saves the embarrassment of going around with a droopy hem

An adjustable ironing board is very handy for a mother with a sick child. Place the ironing board by the bedside to provide a place for work or play. Swing part way across the bed for mealtimes or snacks. This also works for adults.

When a child first starts to sleep in a bed, store the crib mattress under the bed Pull it out when he goes to sleep to help ease any possible bumps he may get from falling out of bed

Use an old food scraper to clean off the shovel, hoe and other garden tools after they are used

A good way to keep garden tools in place is to use a man's old leather belt Nail it to the garage wall, spacing the nails so that you can slide the handles of the rakes, hoes, etc , through

An extra bicycle basket in the kitchen cupboard is an excellent place to store pot lids and cookie sheets The basket can sit right on the cupboard floor or be hung on a wall

If your children have written on your wood paneling with colored crayons liquid furniture polish with lemon oil will remove not only the marks but the dirt as well The paneling will look beautifully polished

When raveling any hand-knit garment, wind the crinkly yarn on a wire coat hanger with the curved ends pushed in Then suds the wood (still on the hanger) and hang by the hook to dry Rewind and reknit Wool so washed has no tangles and is like new

Save the elastic bands from your discarded panty hose and use them in the summer shorts you make for your children This works well as the bands are never worn out when the hose gets runners

If you like to embroider and your thread has a tendency to tangle, try this Wind each color in a little ball and put each ball into an empty pill bottle Punch a hole in each plastic lid, put the thread's end through it and you can pull out the length needed.

PUREBRED GUERNSEY SALE
Thursday, June 22 - 12:30 Noon
At the Ass'n. Sales Pavilion, Lancaster, Pa.
63 HEAD - 35 COWS - 16 BRED AND 12 OPEN HEIFERS
28 HEAD DUE FROM JUNE THROUGH NOV.

The sale primarily features the dispersal of two purebred herds, one from E. R. Bolig, Selinsgrove, the other from Alvin C Gerrick, Littlestown. Neither herd has records, but the use of good bulls built these profitable herds for the owners.

Mr. Bolig used popular bulls from Sire Power. Alvin Gerrick used two outstanding bulls from the herd of Mervin K. Myers, Littlestown The bulls have strong backgrounds with high records on the dams and daughters of dams.

This may turn out like an old-fashioned barn yard sale where a buyer with a good eye can pick up some real bargains. The fact that so many are summer fresheners in both herds should have particular appeal.

Sale Managed By:
Penna. Guernsey Breeders' Ass'n
P. O. Box 458 Camp Hill, Pa. 17011

PUBLIC SALE

USDA Crop and Weather

The Nation's farmers, marketers, and consumers have benefited from a century of service by thousands of weather observers, county agents, and crop reporters who have provided current and reliable information on the weather's effect on our food and fiber supply.

The weather-crop service, begun in 1872, is now a cooperative effort of the U.S. Departments of Agriculture and Commerce. It has undergone a number of alterations in its century of growth; originating with the Army Signal Corps from a pioneer project of the Smithsonian Institution, it switched to the Weather Bureau of USDA in 1891, and in 1940 became the joint product of USDA crop experts, and Commerce's weather specialists.

Weather and crop condition summaries appear in the national Weekly Weather and Crop Bulletin. Releases from State offices of USDA's Statistical Reporting Service add

local details. The information influences decisions on production by farmers, inventories or processors, and ultimately the availability of foods and the prices consumers pay.

The weather-crop service is the outgrowth of reports supplied by countless SRS crop reporters, the Cooperative Extension Service's agents in over 3,000 counties, and 13,000 weather observers with Commerce's National Oceanic and Atmospheric Administration. Information from these people, mostly volunteers, is funneled through NOAA's National Weather Service and State SRS offices.

PENN-JERSEY HARVESTORE SALUTES DAIRYMEN

Leading milk producers ask the question...

Why dry corn?

Walter Nowatzski, Markesan, Wisconsin
"100 pounds of high moisture corn has the feed value of 100 pounds of dry corn...I'm sure of it... We're feeding 450 head of beef and dairy animals and that extra water really pays off. We ran out of Harvestore feed once and had to feed from the conventional silo...production went down 300 lbs. a day. Harvestore feed costs only 6c a day per animal."
Mr. Nowatzski is served by Fox Valley Harvestore, Inc., Appleton, Wisconsin.

Joe Barta, Perkins, Oklahoma
"Our Harvestore high moisture grain units are saving us $1,091 00 per month plus our butterfat test is up 3 points .
We spent more for commercial feed from January 1 to April 15 than we did for high moisture grain from April 15 to December 31 and we carried more cows. Our teenage son can feed about 150 head in only 20 minutes per feeding."
Mr. Barta is served by Edwards Equipment Company, Ponca City, Oklahoma.

Jack and Jerry Kanach, Ringoes, New Jersey
"Harvestore high moisture corn cut our purchased feed costs in half and we now milk twice as many cows...
It used to cost us $800 per month for custom grinding and protein for 80 cows. Supplement for 160 cows is now only $400 per month. We're getting better production and Harvestore feeding has allowed us to increase butterfat from 3.5% to 4.0%."
Jack and Jerry Kanach are served by Penn-Jersey Harvestore Systems, Inc., New Holland, Pennsylvania.

Bill Jones, Philpot, Kentucky
"The expense of hauling corn to the feed mill for drying and storage used to eat up our milk check...
Now I store corn at high moisture in my Harvestore. Wet corn is more palatable and cows produce better on it. Last year we ran short of corn because of the blight and production dropped, but it went up again when we resumed feeding high moisture corn."
Mr. Jones is served by K-T Harvestore Systems, Guthrie, Kentucky.

Now balance the costs of drying and bin storage against the advantages of processing grain at high moisture through an automated Harvestore System. With Harvestore, you harvest early, when your grain has more feed value and before weather and lodging take their toll. Grain goes from field to structure. There's less handling, less labor, no drying cost, no shrinkage. Mildly fermented Harvestore high moisture grain is highly nutritious and palatable, too. Livestock thrive on it.

The information contained herein is general in nature and is drawn from sources deemed to be reliable Any application to a particular farming operation requires the advice of qualified experts and is subject to limitations of good management, weather and other conditions present at the individual location.
